Re: 656 Riverside Street, Portland, ME
Electrical Permit No. 2017-04196

Dear Mr. Morin:

Green Mountain Communications, Inc. (Green Mountain) is sending this letter in response to our final electrical walk at the above-referenced job site.

We would like to have the records show that the 400 amp feed, the utility pole and the conduit riser on the pole were relocated after the City of Portland's service inspection. Green Mountain was not asked to, nor did we participate in, the relocation. We request that any liability that may occur to this service feed not be applied against our electrical license.

If you have any questions or require additional information, please do not hesitate to contact me at (603) 817-0379 or d.skelley@greenmtncomm.com.

Sincerely,

A handwritten signature in black ink that reads "Douglas Skelley". The signature is written in a cursive style with a large, sweeping flourish at the end.

Douglas Skelley
Electrical Project Manager
