As requested, please find the remaining attachments herein in order to provide an electronic copy of the UPS submission for AT&T wireless installation ME5372 at the cell tower located at 636 Riverside Street.

Specifically the attachments herein include the [VI] 23-sheet long manufacturer's specification sheets (each in own PDF) for the prefabricated shelter. This is the 2<sup>nd</sup> email for this application's files.

Note that this application is intended to renew right previously granted to AT&T (Building Permit 2014-01331, reinstated as 2016-92926).

Also, see the separate 1<sup>st</sup> email that included the [I] 11-sheet long Construction Drawing (each CD sheet in own PDF), as well as copies of the [II] General BP Application, [III] Checklist, [IV] Structural Analysis and [V] Certificate of Insurance, which were separated to maintain individual email size below 5 MB.

Thanks,

**Alex Murshteyn | Site Acquisition Specialist**
