Hi Chris:

The height from the foundation slab to the top of the tank will measure approximately 40 FT.

Please let me know if you have any other questions.

Cheers  
Chris Pickles

Hi Chris,

Taking a look at your permit application for the changes to the slab and pump station at Allagash. Does this project include the installation of a new tank, and if so, can you provide the height measurement for the tank on the slab?

Thanks,  
Chris
