Notice: Under Maine law, documents - including e-mails - in the possession of public officials or city employees about government business may be classified as public records. There are very few exceptions. As a result, please be advised that what is written in an e-mail could be released to the public and/or the media if requested.

Jeanie,

As discussed, I added the actual seating tally to the A1 drawing attached. They are identified in each seating area in a box, as well as the table added to the lower right corner of the sheet. The seating tally is 190 (75 lower than the area calculation in the Load Table).

I also added sheet A2, which includes just the interior portions of the building. We added the portions of the building directly off the retail/tasting area that include the retail cooler, Admin/Reception area, and the associated ADA Unisex Toilet room. These areas are always accessible to Staff during Tasting Room operational hours, and hence, are available for patrons should the need arise, as discussed.

Please let me know if you have any questions or comments.

Thanks again for all your assistance, as always.

Mike
