Subject: Comments needed please Fwd: Re: 81 Industrial Way

Jean -

The proposed landscape plan for 81 Industrial Way would benefit from the planting of two additional trees in the parking lot area. One of which would be in the island closest to the exit. Parking lot islands should also have a percentage of 'ground cover' that could consist of native Sweet Fern, daylilies or similar...

Noted very successful low maintenance planting of Sweet Fern in the parking lot island at Jackson Lab in Bar Harbor recently
Shade trees planted along the edge can be 2" caliper. I am willing to meet with project team if interested to review options.
Thanks,

Jeff
