PERMIT ISSUED

Permit Number: 070635

JUN 13 2007

CITY OF PORTLAND

This is to certify that HANNAFORD BROS CO /
 has permission to tent to be set up in parking lot for events on 7/22/07
 AT 783 RIVERSIDE ST 327A A012001

provided that the person or persons performing or supervising the work accepting this permit shall comply with all of the provisions of the Statutes of the State and of the Ordinances of the City of Portland regulating the construction, maintenance and use of buildings and structures, and of the application on file in this department.

Apply to Public Works for street line and grade if nature of work requires such information.

Notification of inspection must be given and when permission proceeds before this building or part thereof is occupied or services closed-in. 4 HOUR NOTICE REQUIRED.

A certificate of occupancy must be procured by owner before this building or part thereof is occupied.

Please submit all of the information outlined in the Tent/Canopy and Event Staging Permit Application as one package. Failure to do so will result in the automatic denial of your permit.

I hereby certify that I am the Owner of record of the named property, or that the owner of record authorizes the proposed work and that I have been authorized by the owner to make this application as his/her authorized agent. I agree to conform to all applicable laws of this jurisdiction. In addition, if a permit for work described in this application is issued, I certify that the Code Official's authorized representative shall have the authority to enter all areas covered by this permit at any reasonable hour to enforce the provisions of the codes applicable to this permit.

Signature of applicant: <u>Melissa Sprague</u>	Date: <u>5/15/07</u>
---	-----------------------------

This is NOT a permit; you may not commence ANY work until the permit is issued.

Hannaford Bros. Co.

May 18, 2007

To Whom It May Concern:

Hannaford Brothers Corp gives emg3, LLC (emg3), limited liability company based in Maine, full permission to execute their Hannaford "Summer Celebrations" Summer Grilling event at the attached list of Hannaford stores. These events will be held in Hannaford store parking lots between June 4th and July 22, 2007.

We have approved emg3 to erect two canopies, have an emcee broadcast over a PA system, and conduct free sweepstakes and food sampling activities.

Also, emg3 is authorized to act on our behalf to obtain the permits necessary to execute their event. They will be responsible for the proper disposal of all refuse and maintaining the property free from litter and nuisance during the total period of operation. Hannaford Brothers Corp has been named an additional insured and loss payee on emg3's general liability and umbrella policies. Accommodations will be made for any municipality seeking to be named an additional insured and emg3 willingly assumes liability for this event.

Sincerely

Evan Harding

NATURHOLZPLATTEN

Technical notice natural wood panels

Natural wood panels are multi-ply solid wood panels with two parallel face plies glued on either side of a middle core layer at 90° (cross-grain veneer effect). The middle core layer is made up of strips butt-jointed and glued together with tight joints. The face plies are made of continuous joint-tight glued individual laminae. The face plies and the core are as a matter of principle made of the same type of wood.

TILLY natural wood panels are manufactured to OENORM B3022 and are tested to OENORM B3024. Production to EURO-CEN standards (prEN 122.2013) has already been introduced.

Product description:

Wood species: Spruce, pine, larch, Swiss stonepine, maple, birch, aged copper beech, sweet chestnut, oak, alder, ash, cherry, red alder, robinia, elm.

Panel dimensions:	Total thickness, hardwood (in mm):	20, 26
	Total thickness, softwood (in mm):	13, 15, 19, 22, 26, 32, 42; other thicknesses may be possible on request:
	Lengths, softwood (excl. Swiss stonepine):	4.0; 4.5, 5.0 m
	Lengths, hardwood (and Swiss stonepine):	0.60; 0.69; 0.72; 0.95; 1.25; 1.65; 2.05; 2.30; 2.50; 3.00; 3.50; 4.00 m
	Widths, softwood (excl. Swiss stonepine):	1.25; 2.05 m
	Width, hardwood (and Swiss stonepine):	1.25 m
Dimensions of face ply and core:	Face ply, softwood (in mm):	3.5; 5.5; 7.2; 9.5
	Face ply, hardwood (in mm):	5.5
	Core, softwood (in mm):	6.0; 8.0; 9.0; 11.0; 13.0; 15.0; 17.0; 21.0; 23.0
	Core, hardwood (in mm):	9.0; 15.0
Standard panel structure (examples):	Softwood panels (in mm): (FP = face ply, C = core)	FP - C + FP = total 3.5 + 6.0 + 3.5 = 13 mm 3.5 + 8.0 + 3.5 = 15 mm 5.5 + 8.0 + 5.5 = 19 mm 5.5 + 15.0 + 5.5 = 26 mm 5.5 + 13.0 + 5.5 = 32 mm 9.5 + 23.0 + 9.5 = 42 mm
	Hardwood panels	5.5 + 9.0 + 5.5 = 20 mm 5.5 + 15.0 + 5.5 = 26 mm special panel constructions may be possible on request:

Qualities/mix: all qualities can be combined with each other for upper and lower surfaces of the panels (e.g. upper face ply, quality class A, lower face ply, quality class B). With hardwood only A and B can be combined. Special combinations on request. All quality specifications are based on OENORM B3022 table 1.

TECHNICAL DATA SHEET

MICROONDA

DOUBLE WALL POLYPROPYLENE COPOLYMER PLATES

- MICROONDA is a re-elaboration of alveolar polypropylene studied for the sector of graphics, communication and promotion: a careful analysis of the market, a careful selection of base raw materials, and advanced technology of transformation, are the base elements to test super structured Microonda placed at top level quality, of reliability and service.
- MICROONDA is used for the realisation of safety barriers and divisors that can meet the following needs:
 - great resistance to shocks, even violent
 - great stability to thermal differences and atmospheric agents
 - it must be light, but robust and unbreakable at low temperatures
 - it must be easy to transport
- MICROONDA is the ideal support for self adhesive letter with immediate sticking and following removable
- MICROONDA is the suitable support on which digital elaborates are laminated on adhesive or pre-sticked
- MICROONDA is suitable for direct digital printing with air-brush equipment (spray jet)

HOW TO USE MICROONDA

The organoleptic structure and detensioning process make Microonda a product particularly stable and at high mechanical stability.

- Microonda is suitable for screen printing, spray jet and digital printing
- Microonda can be plied, cut, sawed, perforated, cut and die-cut by equipment used in transformation laboratories
- Microonda can be fixed with nails, screws and it does not need any pre perforation for medium, small formats

OTHER DATAS

- The composition of Microonda is in conformity with Italian law for food contact (D.M. of 21.03.1973)
- Microonda is a product biologically inert, chemically non reactive: it is not dangerous in transformation process, following the instruction E.E.C. 67/548 and D.M. 21.05.1981.
- Microonda does not fear water and it remains unaltered to weather, it does not fear chemical agents and greases

INDICATION OF SAFETY RULES DURING TRANSFORMATION

During all process of transformation from resin raw material to laminate, following transformation condition and equipment used, some decomposition products under a steam form, can develop and in high concentration can create mucous membrane irritation.

For this reason, it is necessary a good ventilation and aeration of working areas, installing aeration devices directly on equipment.

Ended the process of hot transformation from resin to laminate, any further hypothesis of exhalation and/or odour and taste has to be excluded: so in working area at room temperature, Microonda cannot show, for the worker health, any prejudicial effect, deriving from the same laminate.

MICROONDA

D.M. 25.07.1987 n.555	Classification and labelling	Not requested
Rules A.C.G.I.I.1987/88	Specific product dust	Not assigned limits
D.M. of 21.03.1973	Food contact	In conformity

BEHAVIOUR LIMITS

SOFTENING TEMPERATURE	108 - 122 °C
TRANSFORMATION TEMPERATURE	140 - 250 °C
STARTING DECOMPOSITION TEMPERATURE	> 300 °C
INFLAMMABLE TEMPERATURE	FLASH > 360 °C
SPONTANEOUS COMBUSTION TEMPERATURE	> 420 °C
THERMAL LIMIT	10000 at 103 °C
	10000 at - 20 °C

EMERGENCY INTERVENTION

Loss and expansion

Collect with available manual or mechanical means.

Elimination of the product that cannot be used:

- In checked dumping ground (the polypropylene is similar to urban solid waste);
- By incinerator;

Fire

The polypropylene can burn even with slow primer; it burns with white smoke and flame; it develops a maximum of 1000 K cal/Kg. The extinguish agents are: water, foam, spray water, chemical dust (Halon) carbon dioxide (CO₂).
