Hi Barbara-

Chris and CJ Lefevre at Form Systems - 200 Riverside Ind. Pkwy. - would like to construct a small addition as located on the attached site plan. Laurie and I have reviewed the building size and we have enough s.f. remaining to consider building a small addition. The issue is a piece of new printing equipment that has displaced their IT folks in an otherwise full building and they need space for them. Seems relatively minor relative to the work just completed but wanted to check in with you. We are thinking about 500 s.f. located where an existing impervious wood deck is, so I do not believe we are adding any impervious, though if we can add a bit more s.f. we would like to do that.

Thanks-

Joe
