MEMORANDUM

TO: David Jordan, Code Enforcement Officer

FROM: James Seymour, Acting Development Review Coordinator

DATE: January 9, 1996

RE: Temporary Certificate of Occupancy for 100 Beverly Street

I have reviewed the single family residence at 100 Beverly Street and believe it would be acceptable to issue a temporary Certificate of Occupancy. A permanent Certificate of Occupancy should not be issued until the following conditions have been met.

1. At the time of my inspection, the ground surface was covered with 2 feet of snow making it difficult to review the lot grading. It appears that lot grading may be necessary in the spring. There may be a problem with the bulkhead elevation of the house. This elevation of the bulkhead should be 6 inches higher than the ground and be graded to conform to the natural grade and provide positive drainage away from the house. A swale is also necessary to provide positive drainage for off-site flows crossing the rear of the lot.
2. The disturbed lot area shall be loamed, seeded and mulched no later than May 14, 1996 and approved by the Development Review Coordinator.
3. Two trees need to be planted along the street frontage to meet the City requirement. Trees shall be planted and reviewed by May 14th.
4. Erosion control fencing or approved equal shall be installed along the drainage easement swale and across area subject to shallow flows. All erosion control measures shall be installed as soon as the ground is thawed enough to properly set in place. Measure must be in place prior to April 1, 1996.

cc: Kathi Staples PE, City Engineer
