CITY OF PORTLAND  
BUILDING CODE CERTIFICATE  
389 Congress St., Room 315  
Portland, Maine 04101

TO: Inspector of Buildings City of Portland, Maine  
Department of Planning & Urban Development  
Division of Housing & Community Service

FROM: DAVID S. WITTLIFF PE

RE: Certificate of Design

DATE: 12.7.04

These plans and / or specifications covering construction work on:

OFFICE & WAREHOUSE RENOVATION, 56 MILLIKEN RD. FAL

BARBER FOODS

Have been designed and drawn up by the undersigned, a Maine registered Architect / Engineer according to the 2003 International Building Code and local amendments.

As per Maine State Law:

\$50,000.00 or more in new construction, repair expansion, addition, or modification for Building or Structures, shall be prepared by a registered design Professional.

Signature: David S. Wittliff

**To:** Jeff Shorey, Barber Foods  
**From:** David S. Wittliff PE, Food Tech Structures, LLC  
**CC:** Mike Costain PE, Food Tech Structures, LLC  
**Via:** email

**Project:** Milliken Warehouse  
**Reference:** Special Inspections  
**No. of Pages:** cover, Specification Section 01450

---

---

Jeff,

Attached is specification section 01450 Special Inspections that defines the special inspection requirements as defined in Ch. 17 of the IBC. Mike Costain has arranged for the following:

S. W. Cole to act as both the special inspector and as the materials testing agency.

Phil Hodge PE is the Structural Engineer of Record for the bar joist modification and will inspect that work when complete.

Food Tech Structures, LLC is the Structural Engineer of Record for the building and will review all special inspection and material testing reports.

Please forward this to the City of Portland Building Inspector.

**SCHEDULE OF SPECIAL INSPECTION SERVICES**

The following sheets comprise the required schedule of special inspections for this specific project. The construction divisions which require special inspections for this project are as follow:

- Soils and Foundations
- Cast-in-Place Concrete
- Precast Concrete Planks
- Masonry
- Structural Steel
- Steel Joists & Girder
- Metal Deck
- Wood
- Inspection of Fabricators
- Sprayed Fire-Resistant Materials
- Special Cases

inspection Agents	Firm
1. Special Inspector	S.W. Cole Engineering Inc.
2. Materials Testing Laboratory	S.W. Cole Engineering Inc.
3. Joist Modifications	Philip Hodge, P.E., Habco
4. SER	Food Tech Structures, LLC

<b>SOILS AND FOUNDATIONS</b>		
<b>Item</b>	<b>Agent No.</b>	<b>Scope</b>
1. Foundation Bearing Strata 1.       (periodic) 2.	2	Observe subgrade prior to placing foundations for compliance with anticipated conditions stated on construction documents and geotechnical reports.

<b>CAST-IN-PLACE CONCRETE</b>		
<b>Item</b>	<b>Agent No.</b>	<b>Scope/Frequency</b>
3. 1. Mix Design (periodic)	2	Review concrete mix design submittals for all classes of concrete specified on the Drawings or Specifications. <b>Proportioning</b> of materials shall be in conformance with ACI 318 SEC. 4, 5.2, 5.3 or 5.4.
4. 2. Material Certification 5. (periodic)	2	Review material certificates of compliance or other acceptable documentation for all materials used in the concrete mix designs for conformance with ACI 318-95 Chapter 3.
6. 3. Reinforcement and 7. Reinforcement Installation (periodic)	2	Verify material conformance with specified ASTM. <b>Weldability</b> of material except that which conforms with ASTM A706 shall be determined by carbon equivalency method. Welding of rebars shall conform to AWS D1.4. Inspect the following percentages of installed reinforcement for compliance with approved construction documents, project specs and ACI 318 SEC. 3.5, 7.1, 7.2, 7.3, 7.4, 7.5, 7.6 and 7.7. Footings 50%, Foundation <b>Walls</b> 100%.
8. 4. Batching Plant	2	Periodic
9. 5. Formwork Geometry 10. (periodic)	2	Review formwork to insure the finished concrete size and shape will meet the general requirements of the contract documents. Inspection of form removal and reshoring <b>shall</b> be conducted to verify compliance with ACI Section 6.2.
11. 6. Concrete and Shotcrete 12. Placement (continuous)	2	Review ready mix truck delivery tickets for <b>proper</b> class of concrete and required admixtures. <b>Test</b> for proper slump (ASTM C-143), air content (ASTM C-173 or C-231) and temperature. Inspect that preparation of equipment, place of deposit, mixing, conveying and depositing techniques are in conformance with ACI 318 SEC. 5.7, 5.8, 5.9, 5.10 and the contract documents.
13. 7. Evaluation of Concrete 14. Strength (sampling fresh concrete, ASTM C172)	2	Make <b>one strength</b> test for each 150 cubic yards or fractions thereof from each mix design of concrete placed in any one day, except that in no case the frequency of testing be less than five strength tests for a given class of concrete. Test specimens are to be molded, cured and tested in conformance with ACI 318 SEC. 5.6.
15. 8. Curing and Protection (periodic)	2	Inspect all concrete periodically for maintenance of proper curing and protection techniques in compliance with ACI 318 SEC. 5.11, 5.12 and 5.13 and Specification.
16. 9. Inserts and Anchor Bolts (continuous)	2	Confirm size, length and embedment of anchor bolts, inserts and embedded bolts. Verify inserts for compliance with contract plans.
10. Expansion and Epoxy Bolts (periodic)	2	Review material report from approved agency. In the absence of such approval in-site load tests as directed by Engineer shall be required to assure compliance with manufacturer's load tables.

<b>MASONRY ICC Table 1704.5.1 Level 1 Applies</b>		
<b>Item</b>	<b>Agent No.</b>	<b>Scope</b>
17. 1. Material Certification	1 or 2	Review all material submittals for each type of structural masonry unit, mortar, grout reinforcement and admixtures specified for conformance to ACI 530.1/ASCE 6 Part 2 and project Specifications. Verify installed materials conform to approved samples.
18. 2. Mixing of Mortar and Grout (periodic)	1 or 2	Conduct sufficient number of periodic field review of mortar and grout proportioning, mixing and <b>consistency</b> to establish conformance with ACI 530.1/ASCE 6, Part 2, and the construction documents, a minimum of one day per week.
19. 3. Installation of Masonry (periodic)	1 or 2	Conduct sufficient number of periodic field review of masonry unit and mortar installation to establish conformance with ACI 530.1/ASCE 6 and the construction documents, a minimum of one day per week.
20. 4. Reinforcement Installation (periodic)	1 or 2	Conduct sufficient number of periodic field reviews of reinforcement installation to establish conformance with ACI 530 Chapter 1.12 and ACI 530.1/ASCE 6, Part 3.4, and the construction documents, a minimum of one day per week.
21. 5. Grouting Operations (periodic) (grout placement; continuous)	1 or 2	Verify grout space is clean. Review 50% of all grouting for conformance to ACI 530.1/ASCE 6 Section 3.2, 3.3B, 3.4 and 3.5 and the construction documents.
22. 6. Weather Protections (periodic)	1 or 2	Conduct field review of completed masonry protection in accordance with contract Specifications. Further, when the ambient temperature is below 40°F or above 90°F, review protection for conformance to ACI 530.1/ASCE 6, Part 1.8, ACI 530/ASCE5 Section B.5.7.2 and the construction documents.
23. 7. Evaluation of Masonry Strength (Structural Bearing Walls only)	1 or 2	Verify $f'_m$ of masonry prior to construction and at every 5,000 sf during construction by unit method or prism test method (as specified in Specification) in conformance with ACI 530.1/ASCE 6 Part 1.4.
26. 8. Anchorage 27. (periodic)	1 or 2	Review all exposed and 50% of concealed anchorages during construction for multi-wythe walls and masonry attachment to structural members to verify conformance with the construction documents.
28. 9. Expansion and Epoxy Bolts 29. (periodic) 30.	1 or 2	Review material report from approved agency. In the absence of such approval in-site load tests as directed by Engineer shall be required to assure compliance with manufacturer's load tables.

<b>STRUCTURAL STEEL</b>		
<b>Item</b>	<b>Agent No.</b>	<b>Scope</b>
31. 1. Fabricator Certification Quality 32. Control Procedures	1 & 2	Verify whether Fabricator holds a current AISC Category I or II certification, or is a member of the Structural Steel Fabricators and conducts a periodic in-plant inspection by an approved independent agency. During the fabrications, verify the fabrication and quality control procedures determined above are being properly implemented.
33. 2. Material Certification	1 & 2	Inspect structural steel bolt, nut and washer and weld filler material for proper materials identification markings as required by the approved Drawings and AISC-ASD, Section A3.4 and A3.6; AISC LRFD, Section A3.3 and A3.5. Review all structural steel certified mill test reports and bolt nut and washer and weld filler manufacturer's certificates of compliance for conformance with the proper ASTM or AWS standards.
34. 3. Bolting a. Bearing-Type (periodic inspection) b. Slip-Critical (continuous for turn of nut or calibrated wrench method)	1 or 2	Inspect all bolted connections for required size, location and number of bolts and also for contact of plies. Inspection, minimum bolt tension, method of tightening and method of inspecting installed bolts shall be as specified in "Specifications for Structural Joints Using ASTM A-325 or A-490 Bolts", and the commentary that follows. Use of a calibrated torque wrench on a previously tightened bolt is not an acceptable method of inspection.
35. 4. Welding continuous inspection except periodic for: c. Single Pass Fillet Weld < 5/16 d. Floor and Deck Welds e. Welded Studs Welding Stairs and Railing System	1	Reference Standards: AWS D1.1, D1.3, D1.4. Perform a complete visual inspection of all shops and field welds in accordance with Section 6 of the AWS "Structural Welding Code". Perform NDT inspections as follows: U.T. Inspection 100% of field welds, 50% of shop welds (special inspection of welds performed in approved shops is not required). Weld inspectors shall be AWS Certified Welding Inspectors. Verify weldability of reinforcing steel except A706.
36. 5. Shear Connectors (periodic)	1 or 2	Material certification per Item 2, above. Welds shall be visually inspected. U.T. inspection of welds is not required unless noted on Drawings or Specification.
37. 6. Structural Details	1 & 2	Visual inspection of the erected steel frame to verify compliance with AISC "Code of Standard Practice" and with details shown on the approved erection shop drawings and construction documents, such as bracing, stiffening, member locations and proper application of joint details at each connection.
38. 7. Other

DIVISION 1 - GENERAL REQUIREMENTS

**SECTION 01450 SPECIAL INSPECTIONS**

**PART 1 GENERAL**

1.1 GENERAL REQUIREMENTS

- A. The construction inspection and testing required by this Section is in addition to the inspections required by the Building Officials. Special inspection is not a substitute for inspection by a local municipal building inspector. Specially inspected work which is installed or covered without the approval of the Engineer or local municipal building inspector is subject to removal or exposure.
- B. The Owner shall employ the inspectors or testing agencies
- C. Special Inspector shall be an independently established and recognized agency regularly engaged in conducting tests or furnishing professional and inspection services and shall be approved by the Engineer. The agency shall disclose all possible conflicts of interest so that objectivity can be confirmed. The agency shall have adequate equipment to perform all required tests. Personnel performing special inspection activities shall have qualifications according to the requirements for special inspector as noted below.
- D. Special inspector shall:
  - 1. Be a qualified person who shall demonstrate competence, to the satisfaction of the Building Official and Engineer, for inspection of the particular type of construction or operation requiring special inspection.
  - 2. Be under the supervision of a professional engineer registered in the state in which work is under construction.
  - 3. Observe the work assigned for conformance with the approved Drawings and Specifications and shall keep records of inspections.
  - 4. Furnish inspection reports directly to the Building Official and Construction Manager/General Contractor and the Engineer. Reports shall indicate that work inspected was done in conformance with approved construction documents. Discrepancies shall be brought to the immediate attention of the Contractor for correction, then, if uncorrected, the attention of the building official and Engineer prior to completion of that phase of work.
  - 5. Submit a final signed report stating the work was in conformance with the approved Drawings and Specifications and the applicable workmanship provisions of the governing state code.
- E. Should the Contractor fail to notify the special inspector or inspection agency when their services are required and testing is not performed, this Contractor shall bear the cost of non-destructive testing as determined by the Engineer to determine compliance.
- F. Continuous inspection is always required during the performance of the work unless otherwise specified.
- G. Special Inspector shall review this specification and Chapter 17 of the Inspection Building Code. In the event of conflict with this specification and the Building Code, the Code shall govern.

1.2 ADDITIONAL TESTING

- A. The Owner will pay for all testing and inspections specifically requested by the Engineer, Owner or Building Official over and above those described in this Section and other Sections of the Specifications.
- B. When initial tests indicate non-compliance with the Contract Documents, subsequent retests will be paid for by the Contractor.
