

Solar Project Summary

Array Orientation

255° (true)

Array Pitch

34° angle

An array of 27 solar panels will be located on your southwest-facing roof, as shown in image to the left. (Rendering not to exact scale). These panels will connect to a string inverter mounted in your basement.

We propose a **8.24kw** solar electric system consisting of a **27 panel photovoltaic array with LG Electronics solar modules and SMA string inverter.**
