MEMO

On June 15, 2010 I inspected a parcel known as Lot 14 in the Auburn Pines Subdivision in Portland. The lot has been surveyed twice, including the initial wetland delineation from 1999 and the subsequent plan that was revised in 2004 showing less wetlands than the original plan. A new wetland delineation will be needed to be positive on the limits of the wetland, but based on field observations and soil pit observations, the wetland seems more closely in line with the 2004 survey, however, this field determination only serves to identify that wetlands are present on the property.

Erosion control devices must be installed and maintained on the project site during any soil disturbance activity. A Stormwater Management Law PBR or Maine Construction General Permit "NOI" and "NOT" must be filed with the Department if more than 1 acre of area is going to be disturbed on the project site at any given time during construction.
