Permitting

Portland, ME 04101

Permit Department,

In reference to relocation of toilet at 120 Allen Ave Portland -

The preexisting toilet was built on a platform to allow for the water supply line and drainage.

The toilet and platform was removed and water supply line capped.

The tile floor was demo to allow access to reroute & tap into existing water lines.

A new platform was built the water supply line was taped into the bathroom existing supply line. The drainage line was rerouted and lengthened.

The piping was run under the subfloor and no weight bearing floor joists were compromised. The subfloor was replaced and floor tiled.

Regards,

Babak Mohabbati

Project Title: 120 Allen Ave
Project Description: Demo Drywall, Tile Bath Floor
P.O. Number: 000000
Invoice Number: 462

Renovations on the third floor of 120 Allen Ave were executed to allow for a 6'8" head room above toilet in existing bathroom. There was a closet that was adjacent to the bathroom. The shared wall was not load bearing and contained no studs. The wall was removed allowing toilet to be relocated. The opening to closet from bedroom was patched with interior drywall. The floor was then retiled and trim added.

Sincerely yours,

Neto Campos
