### General Comments

Good morning,  
Today I came for a call back for German cockroaches. I spoke with Al Ahram who informed me that he had seen activity in the kitchen. I placed a gel bait in cracks and crevices behind the oven and refrigerator, under the microwave and throughout the cabinets to reduce and prevent activity. I applied a dust material above the oven as well. Please be aware that the bait will not be as effective if there is food debris around in the kitchen.
