Questions? Call 1-800-498-6117

APPLICATION INSTRUCTIONS

Surface Preparation: Surface must be free from grease and other residues, dry, structurally sound. Be certain existing wallcovering is firmly attached to the wall. Be sure to repair or remove all loose wallcovering. Before proceeding with any unusual conditions, consult your adhesive or wallcovering supplier.

Tinting: N/A

Dilution: Do not dilute

Application Methods: Use only when the room temperature is above 50°F. Apply a thin, even coat of adhesive. **IMPORTANT:** A thick coat is less effective than a thin coat. Avoid contact with the surface of embossed or delicate wallcoverings. On existing heavily embossed wallcovering, VOV should be applied to both the existing and the new vinyl.

Drying Time: Drying time between two vinyls will vary depending on the humidity of the room.

Clean Up: Before the adhesive dries, remove the excess with clean water. Additional effort may be required if the adhesive is allowed to contact the surface of embossed or textured vinyls. The adhesive will not clean up after it dries.

CAUTION

Do not freeze. Do not take internally. In case of ingestion, seek medical attention. Avoid contact with skin and eyes. Use of skin and eye protection equipment is recommended at all times. If contact with eye occurs, flush with water for 15 minutes. If skin contact occurs, wash with soap and water. Seek medical attention if rash or other symptoms occur. Do not mix with other chemicals. Use in a well ventilated work area. Close container after each use. Keep out of reach of children.

8. EXPOSURE CONTROL - PERSONAL PROTECTION

ENGINEERING CONTROLS: Not generally required. If significant amounts of dusts are generated during processing or handling, the need for local exhaust ventilation (LEV) should be evaluated by a professional industrial hygienist. Design details for local exhaust ventilation systems may be found in the latest edition of "Industrial Ventilation: A Manual of Recommended Practice" published by the ACGIH Committee on Industrial Ventilation, P.O. Box 16153, Lansing, MI 48910. Local exhaust ventilation systems should be designed by a professional engineer.

RESPIRATORY: Respiratory protection is not normally required. If appreciable dusts are generated during handling or processing, the operation should be evaluated by a professional industrial hygienist to determine the need for respiratory protection. If respiratory protection is deemed necessary, use, as a minimum, a NIOSH approved 1/2 facepiece respirator equipped with cartridges approved for particulate matter with an exposure limit of not less than 0.05 mg/M³.

EYE PROTECTION: Where eye contact is possible with particulate matter, safety glasses with side shields are recommended.
