Hello Ann,

The total impervious area is approximately 166,663 square feet, putting the impervious ratio at 76.05% on the previously approved plan. The site modifications will result in an approximately 47 square foot impervious area reduction from what is currently approved, which will bring the total impervious area to 166,616 square feet and the impervious ratio to 76.03%.

Best regards,

**Tyler Peabody, E.I.** *Civil Engineer*
