Memo

To: Doug Brown/
From: Mike Nugent/Manager of Inspection Services
CC: Sam Hoffses/Building Inspector
Date: 07/17/2001
Re: Grade adjacent to above ground pools

This office has reviewed your request for grading for the above installation, and find that 2 feet of net area is not sufficient to provide a barrier of 48" as required by Code. After consulting BOCA (code author) and meeting with Sam Hoffses, Building Inspector, our position is that a 4 foot wide net area before any grade change would provide adequate protection as required by the Code. Please feel free to call me at 874-8700.

Re: Permát # 010729

Per your request during your phone conversation with Rebekah Groves on July 16, 2001, regarding the distance away from the pool wall that must meet the 48 inch height requirement, please be advised that we will have at least 2 feet of finished ground around the pool that will meet this height requirement. Please approve by signing below and faxing back to Doug Brown. Fax # 575-7947 Thanks for your help.
