KEY:

- Existing Construction to Remain
- Existing Construction to be Removed, Repair/ Patch all Affected Surfaces and Prepare Surfaces for Associated Finish. See New Second Floor Plan for Locations of New Exterior Openings

GENERAL NOTES

1. The Owners will allow Access and Exploratory/ Selective Demolition during the Pricing Stage to Help the Construction Manager and all Sub-Contractors with Understanding the Existing Conditions and their Respective Scope of Work. This Effort is so the Prices that are presented to the Owner will be Fixed and not Allowances, as Much as Possible. The Construction Manager shall inform the Owner's as to any and all Pricing that is not included as a Fixed Amount and Therefore Must Remain as an Allowance. Areas Potentially Requiring Exploratory/ Selective Demolishing include, but are not limited to: First floor ceiling below New Master Bathroom to help determine if plumbing can chase through existing wall without requiring a new vertical chase, Second Floor Hall/ Stair Walls to Determine Feasibility of Removing Existing Painted Paneling to Refinish/ Paint Existing Walls, Second Floor Front Right Bedroom Ceiling to Determine if patching of ceiling vs. adding a layer of GWB is required once the Acoustical Tile and Strapping is Removed, Etc.
2. Sub-Contractor Responsible for Demolition Shall Shore and Brace Existing Construction prior to Demolition to guarantee that the structural integrity is maintained throughout the construction period. The areas include, but are not limited to the Existing Bath, Existing Hall, Existing Closets/ Bedrooms and Existing Chimney. Review Shoring and Bracing Plan with Construction Manager prior to Demolition.
2. Remove Existing Electrical Switches, Outlets, Light Fixtures, Wiring, Etc., as Required by Demolition and New Construction.
3. Remove Existing Radiator Heat System and Relocate or Provide New as Required by Demolition and New Construction.
