Hi Claude,

I am in receipt of your application to build a new 11'3" x 18' sunroom on the rear of your house. Please note that your property abuts the Fallbrook River and is covered by a 75' setback from the high water line from the edge of the stream toward your house. There is a requirement that no structure be located within that 75' stream protected area. I will need a better plot plan by a professional who can delineate where that stream and 75' setback is on your property and how it relates to your new sun room. Your permit will be on hold until such time a new site plan is submitted. Please submit any new plans to the same web site that your originally submitted your application.

If you have any questions, please call me at 874-8695.

Marge
