## ROCA 1996

## CONSTRUCTION TYPE

## CONDITION(S) OF APPROVAL

This Permit is being issued with the understanding that the following conditions are met:
Approved with the following conditions:

1. This permit does not excuse the applicant from meeting applicable State and Federal rules and laws.
2. Before concrete for foundation is placed, approvals from the Development Review Coordinator and Inspection Services must be obtained. (A 24 hour notice is required prior to inspection)
3. Precaution must be taken to protect concrete from freezing.
4. It is strongly recommended that a registered land surveyor check all foundation forms before concrete is placed. This is done to
5. Verify that the proper setbacks are maintained.
6. Private garages located beneath habitable rooms in occupancies in Use Group R-1, R-2, R-3 or I-1 shall be separated from adjacent interior spaces by fire partitions and floor/ceiling assembly which are constructed with not less than 1 -hour fire resisting rating. Private garages attached side-by-side to rooms in the above occupancies shall be completely separated from the interior spaces and the attic area by means of $1 / 2$ inch gypsum board or the equivalent applied to the garage means of $1 / 2$ inch gypsum board or the equivalent applied to the garage side. (Chapter 4 Section 407.0 of the BOCA/1996)
7. All chimneys and vents shall be installed and maintained as per Chapter 12 of the City's Mechanical Code. (The BOCA National Mechanical Code/1993).
8. Sound transmission control in residential building shall be done in accordance with Chapter 12 section 1214.0 of the city's building code.
9. Guardrails \& Handrails: A guardrail system is a system of building components located near the open sides of elevated walking surfaces for the purpose of minimizing the possibility of an accidental fall from the walking surface to the lower level. Minimum height all Use Groups $42^{\prime \prime}$, except Use Group R which is $36^{\prime \prime}$. In occupancies in Use Group A, B, H-4, I-1, I-2 M and R and public garages and open parking structures, open guards shall have balusters or be of solid material such that a sphere with a diameter of $4^{\prime \prime}$ cannot pass through any opening. Guards shall not have an ornamental pattern that would provide a ladder effect. (Handrails shall be a minimum of $34^{\prime \prime}$ but not more than $38^{\prime \prime}$. Use Group R-3 shall not be less than $30^{\prime \prime}$, but not more than $38^{\prime \prime}$.) Handrail grip size shall have a circular cross section with an outside diameter of at least $11 / 4^{\prime \prime}$ and not greater than $2^{\prime \prime}$.
10. Headroom in habitable space is a minimum of $7^{\prime} 6^{\prime \prime}$.
11. Stair construction in Use Group R-3 \& R-4 is a minimum of $10^{\prime \prime}$ tread and $73 / 4^{\prime \prime}$ maximum rise. All other Use group minimum $11^{\prime \prime}$ tread. $7^{\prime \prime}$ maximum rise.
12. The minimum headroom in all parts of a stairway shall not be less than 80 inches. (6' $8^{\prime \prime}$ )
13. Every sleeping room below the fourth story in buildings of use Groups R and $\mathrm{I}-1$ shall have at least one operable window or exterior door approved for emergency egress or rescue. The units must be operable from the inside without the use of special knowledge or separate tools. Where windows are provided as means of egress or rescue they shall have a sill height not more than 44 inches ( 1118 mm ) above the floor. All egress or rescue windows from sleeping rooms shall have a minimum net clear opening height dimension of 24 inches $(610 \mathrm{~mm}$ ). The minimum net clear opening width dimension shall be 20 inches ( 508 mm ), and a minimum net clear opening of 5.7 sq . ft.
14. Each apartment shall have access to two (2) separate, remote and approved means of egress. A single exit is acceptable when it exits directly from the apartment to the building exterior with no communications to other apartment units.
15. All vertical openings shall be enclosed with construction having a fire rating of at lest one (1 )hour, including fire doors with self closer's. (Over 3 stories in height requirements for fire rating is two (2) hours.)
16. The boiler shall be protected by enclosing with (1) hour fire-rated construction including fire doors and ceiling, or by providing automatic extinguishment.
17. All single and multiple station smoke detectors shall be of an approved type and shall be installed in accordance with the
provisions of the City's Building Code Chapter 9, Section 19, 920.3.2 (BOCA National Building Code/1996), and NFPA 10 Chapter 18 \& 19. (Smoke detectors shall be installed and maintained at the following locations):

- In the immediate vicinity of bedrooms
- In all bedrooms
- In each story within a dwelling unit, including basements

In addition to the required AC primary power source, required smoke detectors in occupancies in Use Groups R-2, R-3 and I-1 shall receive power from a battery when the AC primary power source is interrupted. (Interconnection is required)
A portable fire extinguisher shall be located as per NFPA \#10. They shall bear the label of an approved agency and be of an approved type.
18. The Fire Alarm System shall be maintained to NFPA \#72 Standard.
19. The Sprinkler System shall maintained to NFPA \#13 Standard.
(20.) All exit sigas, lights, and means of egress lighting shall be done in accordance with Chapter 10 Section \& Subsections 1023. \& 1024. Of the City's building code. (The BOCA National Building Code/1996)
21. Section 25-135 of the Municipal Code for the City of Portland states, "No persor
or open any street or sidewalk from the time of November 15 of each year to
22. The builder of a facility to which Sectione of November 15 of each year to April 15 of the following yeur". certification from a design professional that certification to the Division of Inspection Services.
23. Ventilation shall meet the requirement of

Chapter 12 Sections 1210. Of the City's Building Code.
25. All requirements must be met bac permits must be obtained by a Master Licensed holders of their trade.
26. All building elements shall meet the a final Certificate of Occupancy is issued. Building Code/1996).
ing Code (The BOCA National Ventuation of spaces within a building shall be done in accordance with the City's Mechanical Code (The BOCA National Mechanical Code/1993). Please read and implement the attached Land Use-Zoning report requirements.
