Many of our customers choose to enhance their Endless Pool by selecting one or more of our available options. The following pages describe many of the options and how they can complement your pool and swim or exercise experience. Our team of architects and designers can be reached at 800-732-8660 to answer any questions you might have about incorporating these options into your pool.

### Manual Retractable Security Cover

The Retractable Security Cover acts as a horizontal fence sealing off access to the pool. Indoors the cover controls humidity, while outdoors the cover seals out dirt, leaves and debris. The cover retracts onto a roller at one end of the pool and deploys along low-profile tracks installed on the pool coping. A lock-down mechanism is provided to secure the cover over the pool. The cover meets stringent ASTM F1346 safety standards and is strong enough to support the weight of an adult. The cover is available in light blue, aqua, royal blue, grey, tan, forest green and black. Sample color swatches are available. Covers for outdoor installations come equipped with a cover pump that automatically pumps rain water off the top of the cover. Endless Pools strongly recommends a security cover for all installations.

### Size and Depth Options

When deciding upon a length and width for your pool, you should consider such factors as how you intend to use your pool, the general dimensions of the site, your own height, and additional space requirements for options such as jets, lights and a cover.

#### Wider Pools

Our standard pool is ideal for freestyle swimming but people who swim with a wide kick may benefit from a wider pool. Pools up to 3' wider are offered.

#### Longer Pools

If you want to have more than one person using your pool at the same time, a longer pool is a good idea. We offer pools up to 2' longer.

#### Shorter Pools

Looking to install an Endless Pool into a tight space. A shorter pool may be the answer. One to two feet shorter pools offer the same quality current as our standard pools.

#### Deeper Pools

Our standard 42" high Endless Pool is ideal for swimming and seated water exercises on the perimeter benches. Our optional 48" pool can also accommodate many therapy and aquatic exercise routines, as can our deepest 54" unit. Remember taller pools stand higher in the room and ceiling height should be considered. We recommend a deeper pool if you are considering an underwater treadmill.
