Re: 4 Alice Street

Dear Mr. & Mrs. Kenny:

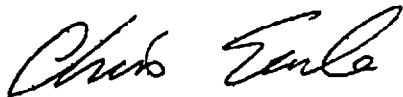

You are hereby granted a conditional fill permit and the stop order is lifted. On September 14, 2000 at 1:00 PM we met at 4 Alice Street (Lot 6) regarding a fill permit for that site. At that time, I gave you a copy of Fill Permit Guidelines for filled areas under 500 cubic yards.

I cautioned you to take care not to fill the City of Portland drainage easement located at the south corner of the site. We also discussed the need for installation of silt fence along the easement and partially around the back of this lot. We agreed that installation and maintenance are very important and you agreed not to fill until this was accomplished.

I also note that when additional development for a single-family residence is proposed, a site plan application to the Planning Authority and Code Enforcement Office will be necessary.

Cordially,

DeLUCA-HOFFMAN ASSOCIATES, INC.

Chris Earle
