Constructed and hydrostatically tested in accordance with ASME Boiler Code, Section IV.

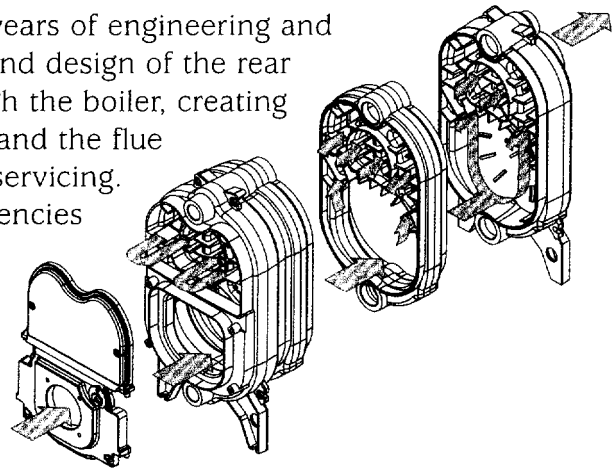

Serviceability...

A unique front jacket panel designed for easy removal allows convenient access to a one-piece swing-out door. The door is both easily opened and completely removable from the vessel for internal inspection and overall maintenance. The Solaia Boiler features a Riello oil burner with a quick disconnect for servicing.

A blend of technology and efficiency

The Solaia is a low mass wet-base boiler with steel push nipples. Constructed of GG20 cast iron for greater durability, excellent heat transfer and resistance to corrosion, the Solaia is the result of over 50 years of engineering and manufacturing experience. The unique turnaround design of the rear casting creates optimal flue gas passages through the boiler, creating high efficiency. There are no baffles to remove, and the flue passages are easily accessible for cleaning and servicing. The Solaia Boiler is Energy Star rated with efficiencies from 86.4% to 87%.

SOLAIA

- 3 pass wet-base design
- GG20 cast iron
- Low mass
- High efficiency to 87%
- Standard design pressure to 58 psi
- Superior serviceability with complete access to all flue passages
