(Lot 6) 87 Curtis Road

Dec. 19, 1966

Charles H. Hanson & Co., Inc.  
193 Allen Avenue

Dear Mr. Hanson:

Permit to construct two 1½ story dwellings, with attached two-car garage and breezeway 66'x26' at the above named locations is being issued subject to plans received with applications and in compliance with Building Code restrictions as follows:

1. Sill for the breezeway on a 10 foot span will need to be at least a solid 6x10 fir member.
2. Threshold at door opening between the garage area and the breezeway shall be raised at least six inches above the level of the garage floor (or an equivalent approved arrangement shall be provided) to prevent the free flow of gasoline fumes into the dwelling house part.
3. Before form inspection is asked for we will need to know what will be used for a structural ridge for the dormer and what the spans will be. A structural ridge is required for this dormer as the pitch of the roof is less than four inches to the foot.

*Very truly yours,*

Very truly yours,

A. Allan Soule

NOTICE RELATING TO SEWAGE DISPOSAL

x means copy sent to the parties (date) December 15, 1966

Location Lot 6<sup>(B-7)</sup> Curtis Road (Valley View Hgts) Description Dwelling-Breezeway-Garage

Owner and Address Charles H Hanson & Co. Inc. 193 Allen Ave.

Contractor and Address \_\_\_\_\_

Architect or Engineer and Address \_\_\_\_\_

Actual Area of Lot 10,000 sq.ft. Sq. Ft. Zone R-2 Residence

Area required by Zoning Ord. if sewer were available 8000 sq.ft.

Where septic tank systems are required for sewage disposal, the Zoning Ordinance provides that the least allowable area of the lot shall be determined by the rate of percolation of the soil, this being the capacity of the soil to allow liquids to pass through as determined by tests. The Building Code directs that, where a septic tank is to be used, a building permit shall not be issued unless the proposed method of sewage disposal has been approved by the Director of Health.

Since application for the above permit indicates that connection to a sewer is not possible, it is necessary for the owner or his agent to file a site plan with the Health Department, to explain the method of sewage disposal proposed, and to make arrangements for a percolation test to be made under supervision of that department.

After the rate of percolation has been determined, the Director of Health will notify this department of the area of lot required on the basis of the results of the test. If the lot area required by the tests is equal to or less than the actual area of the lot and not less than the minimum lot area required in the zone in which the property is located for cases where connection to a sewer is available, the building permit can be issued; otherwise the permit cannot be issued unless authorization is secured from the Board of Appeals.

GERALD E MAYBERRY

Albert J. Sears  
Inspector of Buildings

2 copies to Health Director

\*\*\*\*\*

(This space for Health Department use)
