Department of Building Inspection
NOTICE RELATING TO SEWAGE DISPOSAL

(date) November 17, 1965

x means copy sent to the parties

Location Lot 3 Curtis Road Description Dwelling-dreezeway and Garage

Owner and Address Charles Hanson, 193 Allen Ave.

Contractor and Address owner

Architect or Engineer and Address _____
Zone R-2 Residence

Actual Area of Lot 11,559 Sq. Ft.

Area required by Zoning Ord. if sewer were available 8000 sq.ft.

Where septic tank systems are required for sewage disposal, the Zoning Ordinance provides that the least allowable area of the lot shall be determined by the rate of percolation of the soil, this being the capacity of the soil to allow liquids to pass through as determined by tests. The Building Code directs that, where a septic tank is to be used, a building permit shall not be issued unless the proposed method of sewage disposal has been approved by the Director of Health.

Since application for the above permit indicates that connection to a sewer is not possible, it is necessary for the owner or his agent to file a site plan with the Health Department, to explain the method of sewage disposal proposed, and to make arrangements for a percolation test to be made under supervision of that department.

After the rate of percolation has been determined, the Director of Health will notify this department of the area of lot required on the basis of the results of the test. If the lot area required by the tests is equal to or less than the actual area of the lot and not less than the minimum lot area required in the zone in which the property is located for cases where connection to a sewer is available, the building permit can be issued; otherwise the permit cannot be issued unless authorization is secured from the Board of Appeals.

Albert J. Sears
Director of Building Inspection

2 copies to Health Director

(This space for Health Department use)

Inspector of Buildings

Rate of Percolation is 5 minutes. On this basis area required by Zoning Ordinance is 9100 sq. ft.

Comments in event zoning appeal is filed: _____

ERNEST R. GOODWIN
CHIEF PLUMBING INSPECTOR

Director of Health

A. P. - Lot 3 Curtis Road

Nov. 18, 1965

Charles Hanson
193 Allen Avenue

Dear Mr. Hanson:

Permit to construct 2-story frame dwelling, with 2-car attached garage and breezeway 34'x26' is being issued subject to plans received with application and in compliance with Building Code restrictions as follows:

1. Threshold at door opening between garage and dwelling shall be raised at least six inches above the level of the garage floor (or equivalent approved arrangement shall be provided) to prevent the free flow of gasoline fumes into the dwelling house part.
2. A structural ridge is required for the dormer roof as the pitch will only be 3½ inches to the foot. Before form inspection is called for we will need to know what size ridge will be used and on what spans.

Very truly yours,

A. Allan Soule
Inspector
