Hello,

Please find attached my application to amend my existing permit, ID# 2015-00179. My clients would like to eliminate the squeaks present in the existing subfloor - which is 1/2" CDX plywood - in the Kitchen and Dining rooms. Subfloor will be replaced, where reasonable, with 1/2" Advantech. Finish flooring is 1x4 tongue-and-groove, end matched, strip oak and will be installed perpendicular to existing joists, which are 16" OC. Please let me know if you have any questions.

Aaron.
