A complete plot plan (Site Plan) includes:

- The shape and dimension of the lot, all existing buildings (if any), the proposed structure and the distance from the actual
 property lines. Structures include decks porches, a bow windows cantilever sections and roof overhangs, as well as,
 sheds, pools, garages and any other accessory structures.
- Scale and North arrow; Zoning District & Setbacks
- First Floor sill elevation (based on mean sea level datum);
- Location and dimensions of parking areas and driveways;
- Location and size of both existing utilities in the street and the proposed utilities serving the building;
- Location of areas on the site that will be used to dispose of surface water.
- · Existing and proposed grade contours

Building Plans are required for all construction, including interior rehab (Sample Attached)

A complete set of construction drawings showing all of the following elements of construction:

- Cross Sections w/Framing details (including porches, decks w/ railings, and accessory structures)
- Floor Plans & Elevations
- Window and door schedules
- Foundation plans with required drainage and damp proofing
- Electrical and plumbing layout. Mechanical drawings for any specialized equipment such as furnaces, chimneys, gas equipment, HVAC equipment (air handling) or other types of work that may require special review must be included.

AUTOCAD OR ADOBE FORMAT REQUIRED FOR ALL COMMERICAL PROJECTS

Paul Luce 257 Virginia Street Portland, ME 04103

City of Portland Planning Dept. Congress Street Portland, ME 04102

Attn: Marge Schmuckal

Dear Marge,

I am writing with reference to the proposed 12' x 12' addition on the Tampa Street side of our home located at 257 Virginia Street.

Our reason for adding to our home is that we are expecting our third child in May, 2001 and our home is presently a two bedroom dwelling. We are asking that it be on the left side of the home rather than the right, because of the inside structure of our home. The Right side has the only two entrances to the house as well as the only stairway going upstairs. If we were to add on to this side of the home it would mean adding substantially more cost to the project in order to properly connect the third bedroom to the second floor.

Sincerely,

Paul huce

"Schedule A" 257 Virginia Street Portland ME 04103

Paul G. Luce & Kelly M. Luce

The land with the buildings thereon situated in Portland, Cumberland County, State of Maine known and being numbered 257 Virginia Street:

Being lots numbered sixteen hundred and eighty-five (1685) and sixteen hundred and eighty-six (1686) on Virginia Street, so-called, containing seven thousand five hundred (7,500) square feet, more or less, as shown on Plan of E.O. Stephenson, dated June, 1926 and recorded in the Cumberland County Registry of Deeds in Plan Book 17, Page 7.

The premises are conveyed subject to and with the benefit of all rights, rights of way, easements, appurtenances, reservations, restrictions, and layouts and takings of record, insofar as they are in force and applicable.

Meaning and intending to mortgage the same premises by deed of Donald K. Lockhart, Jr. and Jane H. Lockhart to Paul G. Luce and Kelly M. Luce, dated 03/21/1991 and filed with the Cumberland County Registry of Deeds at Record Book 9500, Page 254; wherein a more detailed description of the premises is set forth.

The City's Adopted Building Code (The BOCA National Building Code/1999 with City Amendments) The City's Adopted Mechanical Code (The BOCA National Mechanical Code/1993)
CONDITION(S) OF APPROVAL
This permit is being issued with the understanding that the following conditions shall be met: $\frac{1}{12}$, $\frac{1}{$
 This permit does not excuse the applicant from meeting applicable State and Federal rules and laws. Before concrete for foundation is placed, approvals from the Development Review Coordinator and Inspection Services must be obtained. (A 24 hour notice is required prior to inspection) "ALL LOT LINES SHALL BE CLEARLY MARKED BEFORE CALLING." Foundation drain shall be placed around the perimeter of a foundation that consists of gravel or crushed stone containing not more than 10 percent material that passes through a No. 4 sieve. The drain shall extend a minimum of 12 inches beyond the outside edge of the footing. The thickness shall be such that the bottom of the drain is not less than 6 inches above the top of the footing. The top of the drain shall be covered with an approved filter membrane material. Where a drain tile or perforated give is used, the invert of the give or tile shall not be higher than the floor elevation. The top of joints or top of perforations
shall be protected with an approved filter membrane material. The pipe or tile shall be placed on not less than 2" of gravel or crushed stone, and shall be covered with not less than 6" of the same material. Section 1813.5.2 Foundations anchors shall be a minimum of ½" in diameter, 7" into the foundation wall, minimum of 12" from corners of foundation and a maximum 6' O.C. between bolts. Section 2305.17 Waterproofing and dampproofing shall be done in accordance with Section 1813.0 of the building code. Precaution must be taken to protect concrete and masonry. Concrete Sections 1908.9-19.8.10' Masonry Sections 2111.3-2111.4. It is strongly recommended that a registered land surveyor check all foundation forms before concrete is placed. This is done to verify that the
 proper setbacks are maintained. Private garages located beneath habitable rooms in occupancies in Use Group R-1, R-2, R-3 or I-1 shall be separated from adjacent interior spaces by fire partitions and floor/ceiling assembly which are constructed with not less than 1-hour fire resisting rating. Private garages attache side-by-side to rooms in the above occupancies shall be completely separated from the interior spaces and the attic area by means of ½ inch gypsum board or the equivalent applied to the garage side. (Chapter 4, Section 407.0 of the BOCA/1999) All chimneys and venus shall be installed and maintained as per Chapter 12 of the City's Mechanical Code. (The BOCA National Mechanical
Code/1993). Chapter 12 & NFPA 211 10. Sound transmission control in residential building shall be done in accordance with Chapter 12, Section 1214.0 of the City's Building Code. 11. Guardrails & Handrails: A guardrail system is a system of building components located near the open sides of elevated walking surfaces for the purpose of minimizing the possibility of an accidental fall from the walking surface to the lower level. Minimum height all Use Groups 42". It occupancies in Use Group A, B.H-4, I-1, I-2, M, R, public garages and open parking structures, open guards shall have balusters or be of solid material such that a sphere with a diameter of 4" cannot pass through any opening. Guards shall not have an ornamental pattern that would provide a ladder effect. Handrails shall be a minimum of 34" but not more than 38". Exception: Handrails that form part of a guard shall have a height not less than 36 inches (914 mm) and not more than 42 inches (1067 mm). Handrail grip size shall have a circular cross section with an outside diameter of at least 1 1/4" and not greater than 2". (Sections 1021 & 1022.0). Handrails shall be on both sides of stairway. (Section 1014.7)
12. Headroom in habitable space is a minimum of 7'6". (Section 1204.0) 13. Stair construction in <u>Use Group R-3 & R-4 is a minimum of 10" tread and 7.34" maximum rise.</u> All other Use Group minimum 11" tread, 7" maximum rise. (Section 1014.0)
14. The minimum headroom in all parts of a stairway shall not be less than 80 inches. (6'8") 1014.4 15. Every sleeping room below the fourth story in buildings of Use Groups R and I-1 shall have at least one operable window or exterior door approved for emergency egress or rescue. The units must be operable from the inside without the use of special knowledge or separate tools. Where windows are provided as means of egress or rescue they shall have a sill height not more than 44 inches (1118mm) above the floor. All egress or rescue windows from sleeping rooms shall have a minimum net clear opening height dimension of 24 inches (610mm). The minimum net clear opening width dimension shall be 20 inches (508)mm, and a minimum net clear opening of 5.7 sq. ft. (Section 1010.4)
16. Each apartment shall have access to two (2) separate, remote and approved means of egress. A single exit is acceptable when it exits directly from the apartment to the building exterior with no communications to other apartment units. (Section 1010.1)
17. All vertical openings shall be enclosed with construction having a fire rating of at least one (1) hour, including fire doors with self closure's.
18. The boiler shall be protected by enclosing with (1) hour fire rated construction including fire doors and ceiling, or by providing automatic extinguishment. (Table 302.1.1)

1/24

	• In the immediate vicinity of bedrooms
	• In all bedrooms
••	• In each story within a dwelling unit, including basements A portable fire extinguisher shall be located as per NFPA #10. They shall bear the label of an approved agency and be of an approved type.
	A portable fire extinguisher shall be located as per NYPA #10. They shall be at the label of all approved agency and be of all approved type. (Section 921.0)
