

*Compact, Quiet, Efficient, Reliable, Clean*

## *QHT/Biasi... The Name to Trust.*

QHT/Biasi has brought heating efficiency to a peak with their low mass multi-pass cast iron boilers. Now they carry on their reputation with Riva - a low mass - high efficiency wall-mounted gas boiler. Biasi's reputation, engineering and quality control can be seen in the new Riva Boiler.

Don't be caught off guard with imitations of the Riva. Some manufacturers have been marketing their "water heaters" as "boilers". Let's look at the difference: they produce less hot water; they are not ASME certified; they have a complicated design thus requiring intensive installation, maintenance and service. Some are more expensive, some are less expensive, but don't be fooled... *get the best from the world's leader in boiler efficiency - QHT/Biasi.*
