Ann: I understand that something concerning the new canopy is holding up the permit for this project. There is an existing canopy which was initially going to be removed, but it has been decided to repair the canopy and leave it. The tenant, NAPA may add an awning in the future above their new entrance door, but that is not in the contractor's scope. The tenant will also be applying for a signage permit in the future.

I have left you a voicemail concerning this permit. Thank you.

Janet L. Hansen AIA, NCARB, LEED AP
