Note:				

Comments:

12/8/2008-amachado: Section 105.3.2 of the 2003 IBC code says , "An application for a permit for any proposed work shall be deemed to have been abandoned 180 days after the date of filing, unless such application has been pursued in good faith or a permit has been issued." I have heard nothing from Brian Harris since 8/18/08, so the application has expired.

8/19/2008-amachado: Spoke to Brian Harris. Just wanted to demo the building and clean up the site. Would go through zone change application at a later date. Barbara said he could go forward with the demo if he submits an erosion control & grading plan and a letter that says what he plans to do ont he site. I left him a voicemail telling him to reapply w/ a written description.

10/19/2007-amachado: Left message for Brian Harris. Need to know if this is more than just a demo permit. If so it will need minor site plan review. What was actual use of building getting torn down?

10/19/2007-amachado: Spoke to Brian Harris. He would like to do the demo and create the cleared gravel area for over flow parking and storage all together. He will apply for minor site plan review. He plans to do the demo and clearing in the spring.

8/15/2008-amachado: Left voicemail for Brian Harris. He had called asking about moving the demo permit forward. The building is located in the R-3 zone. The property will need zone change to be used as storing and parking for the Maine Yatch Center. Can't issue demo permit until zone change goes through and siteplan has been submitted.

①

~~butting down?~~

house & office? - was official

Main Yaku Service - want for year

- any use for parking

site plan review

- send just Amendment

but that's it what site plan review

Spoke to Brian Harris

10/19/02 ~~left message for Brian~~

- wants to do done / create clearance

grand area @ same time

- told him to call Brian - main

site plan review

- he says he will do the actual

work in the spring

②

8/15/08 ² Brian Harris call.

- wanted to move forward with the done

permit for 6 old office building

- I talked to Miss about the use

she said he needs a zone change - R-3

because wants to use it for shopfront

just parking

- she said Brian Harris working w/

Brian

- I called Brian - left vm - done

on hold until site plan approved

ad

- left vm w/ Brian to see when

~~part~~ ~~what~~ ~~site~~ ~~plan~~ ~~is~~ ~~it~~

8/18/05

Spoke to Brian Harris - He said all steps

has been made off property - either in IL

zone or off site - wants to do no building

clean up the lot - pave new - plant grass

etc - will go forward w/ zone change app health

this winter

- spoke to Barbara - will planning of done

3

- of building. Permitted as office - never
been charged single family. - Barbara
will get back home.
- Barbara called back. Or to demo. work
erosion control / grading plan. - write in
writing what he proposes to do on site.
 - left van for Brian Hems - stating that
he really will write the description of
what they.

Demolition of A Structure Permit Application

If you or the property owner owes real estate or personal property taxes or user charges on any property within the City, payment arrangements must be made before permits of any kind are accepted.

Building Demolition Notification Form (BDNF)

Important Notice: Maine law requires the filing of this "Building Demolition Notification Form" prior to demolition of any building except a single-family home

1) Building owners are required to provide this notification of the demolition of a building to the DEP at least 5 working days prior to the demolition. This notification is **not** required before the demolition of a single-family residence or related structure (e.g., garage, shed, barn). It is also **not** required if previous notification of the demolition has been provided to the DEP as part of an asbestos abatement project notification. **Demolition** means the tearing down or intentional burning of a building or part of a building.

2) Prior to demolition, building owners must determine if there is any asbestos-containing material(s) (ACM) in the building. An "asbestos inspection" by a DEP-licensed Asbestos Consultant is required for all buildings except single-family homes and residential buildings with 2-4 units built after 1980. In lieu of an asbestos inspection, pre-1981 residential buildings with 2-4 units can be surveyed to identify possible ACM by someone knowledgeable about ACM, such as a code enforcement officer or building inspector. If materials that may contain asbestos are found, then you can either assume they are ACM or hire a DEP-licensed Asbestos Consultant to test the materials.

3) Whenever more than 3 square feet or 3 linear feet of ACM is identified, the ACM must be abated in accordance with the Maine Asbestos Management Regulations by a DEP-licensed Asbestos Abatement Contractor. This includes materials presumed to be ACM. Check www.state.me.us/dep/rwm/asbestos/index.htm for a listing of asbestos contractors.

Prior to issuing a local demolition permit, the DEP requests that **municipalities** have applicants for municipal demolition permits complete this form and fax it to the DEP at 207-287-7826. Municipalities should not issue local demolition permits if the required asbestos inspection or survey has not been performed and identified ACM removed.

Were asbestos-containing materials found? yes no no inspection or survey required (post-1980 2-4 unit)

Dear Neighbor,

We are applying for a demolition permit with the City of Portland to remove the small white single level house at 65 Kensington St.

We would like to remove this house, level and gravel the lot to create additional space for storage and overflow parking to help better serve our customers.

We will keep the row of large growth trees along Kensington St that currently provide a buffer for the house.

If you could please put your name, address, and signature below, it would be greatly appreciated.

If you have any questions, please feel free to give me a call or drop by to discuss.

Name: Kevin Noone

Address 23 Berwick St

Signature Kevin Noone

Thank you.

Brian Farris
Maine Yacht Center
100 Kensington St
Portland, Maine 04103

Dear Mr. Farris;

Please find enclosed for your review and file, the bulk sampling results that were collected by Kyle Rickett, Maine D.E.P. inspector number AI-0349, at, 65 Kensington St Portland, Maine on September 21, 2007.

Fifteen (15) Samples were collected and sent to EMSL in New Jersey where they were analyzed by Polarized Light Microscopy (PLM) (EPA test method #600/M4-82-020) for asbestos content.

All samples were found to contain **NO** asbestos

The State of Maine Department of Environmental Protection (DEP) considers a material to be an "asbestos containing material" when it is analyzed by PLM and found to contain greater than 1% asbestos

If you have any further questions or need additional information please feel free to contact me at (207)-773-1276.

Sincerely,

Kyle Rickett
Vice President

Due to magnification limitations inherent in PLM, asbestos fibers in dimensions below the resolution capability of PLM may not be detected. Samples reported as <1% or none detected may require additional testing by TEM to confirm asbestos quantities. The limit of detection as stated in the method is 1%. The above test report relates only to the items tested and may not be reproduced in any form without the express written approval of EMSL Analytical, Inc. EMSL's liability is limited to the cost of analysis. EMSL bears no responsibility for sample collection activities or analytical method limitations. Interpretation and use of test results are the responsibility of the client. The test results contained within this report meet the requirements of NELAC unless otherwise noted. Samples received in good condition unless otherwise noted.

Due to magnification limitations inherent in PLM, asbestos fibers in dimensions below the resolution capability of PLM may not be detected. Samples reported as <1% or none detected may require additional testing by TEM to confirm asbestos quantities. The limit of detection as stated in the method is 1%. The above test report relates only to the items tested and may not be reproduced in any form without the express written approval of EMSL Analytical, Inc. EMSL's liability is limited to the cost of analysis. EMSL bears no responsibility for sample collection activities or analytical method limitations. Interpretation and use of test results are the responsibility of the client. The test results contained within this report meet the requirements of NELAC unless otherwise noted. Samples received in good condition unless otherwise noted.
