Hi Bill,

I received a call from Melissa Anson working with the ME Coastal Program. She is putting together an access guide for the State. She wanted to know whether Kendall Street (near Kensington) is a public street. Could you please check the street records so I can get back to her? No need to drop everything just for this, but I would like to know within a reasonable amount of time.

Thank you,

Marge

431-F-9 Kendall St

Thank you Bill,  
I was wondering if the Governor would finally get to ruling on my job.....(I can only dream)  
But thank you for this information.  
I think the ME Coastal Program wants to be sure that they are not directing people over private property.  
thank you for the research.  
Marge

Hi Marge,

Kendall Street was laid out on 12/06/1909. Running 200.00' from Lennox Street.

The layout does not mention to the water, but the aerial image below shows the street acceptance down into the intertidal zone.

The aerial image shows stairs down to the water for Chester St and Kendall St.

Might want to get Danielle's opinion on this. Personally I do not see any reason why we would be able to block access if we are requested by someone in the neighborhood to block access, but that is where I would like Danielle to weigh in on.

When the Governor finally closes down the Planning Office will the Maine Coast Program end?  
<http://www.maine.gov/spo/coastal/index.htm>

I am copying Chuck and Michelle in case someone has made a request from them on this.

Thanks,

Bill
