BUILDING PERMIT INSPECTION PROCEDURES
Please call 874-8703
or email: buildinginspections@portlandmaine.gov

**Check the Status of Permit or Schedule an Inspection at
<http://www.portlandmaine.gov/planning/permitstatus.asp>**

With the issuance of this permit, the owner, builder or their designee is required to provide adequate notice to the City of Portland Inspections Division for the inspections listed below. Appointments must be requested 48 to 72 hours in advance. The inspection date will need to be confirmed by this office.

- **Please read the conditions of approval that are attached to this permit.**
- **Permits expire in 6 months if the project is not started or ceases for 6 months.**
- **If the inspection requirements below are not followed, then additional fees may be incurred due to the issuance of a "Stop Work Order" and subsequent release to continue.**
- **Per Section 107.3.1 of the Maine Uniform Building and Energy Code (MUBEC), one set of printed approved stamped construction documents will be kept at the site of work and open to inspection by building officials.**

REQUIRED INSPECTIONS:

Setbacks and Footings Prior to Pouring
Close-in Plumbing/Framing
Electrical - Residential
Final Inspection

The project cannot move to the next phase prior to the required inspection and approval to continue.

If the permit requires a certificate of occupancy, it must be paid and issued to the owner or designee before the space may be occupied.

| Conditions: | | | | |
| <p>1) The review of this permit did not include a review or confirmation of the zoning legal use. It is only approving the specific work described in the plans and forms submitted. The current use of the property may be found to be unlawful.</p> <p>2) Prior to the City's final inspection, a letter stamped by the engineer of record shall be submitted to this office confirming, that based on their oversight and inspections performed, any discrepancies have been corrected and the structural work is in substantial compliance with the designed plans and the 2009 IBC (MUBEC).</p> <p>3) A code compliant emergency escape shall be provided in each newly created (or additions or enlargement to existing) bedroom(s). Window sills in locations more than 72 inches from finished grade shall be a minimum of 24 inches (no higher than 44 inches) above the finished floor of the room, or in compliance with Section R612.4.2</p> <p>R612.2 Window sills. In dwelling units, where the opening of an operable window is located more than 72 inches above the finished grade or surface below, the lowest part of the clear opening of the window shall be a minimum of 24 inches above the finished floor of the room in which the window is located. Operable sections of windows shall not permit openings that allow passage of a 4 inch diameter sphere where such openings are located within 24 inches of the finished floor.</p> <p>Carbon Monoxide (CO) alarms shall be installed in each area within or giving access to bedrooms. That detection must be powered by both the electrical service (plug-in or hardwired) in the building and battery.</p> <p>Hardwired (non- ionization detection technology) interconnected battery backup smoke alarms shall be installed in each bedroom, protecting the bedrooms, and on every level.</p> <p>Ventilation of this space is required per ASRAE 62.2 , 2007 edition.</p> <p>For conditioned space- insulation shall comply with the IECC, 2009 (Maine State Energy Codes)</p> <p>Safety Glazing for hazardous location shall comply with § R308.4 of the IRC, 2009 (MUBEC).</p> <p>Fireblocking is required to provide a cut off of all concealed draft openings (both vertical and horizontal) in combustible construction, see Sec. R302.11.</p> | | | | |
