Subject: 140003 = Shucks Maine Lobster Demising Wall Permit Application

Good day Ms. Bourke.

We attach our application on behalf of Shucks Maine Lobster for a permit to construct a demising wall as shown on our enclosed plans – see Sections A-A and B-B. The client will have space available to include expansion to Grid 28 which abuts Ready's lobster, being of the same IBC occupancy type = F-1 Factory and NFPA - Specialty Purpose Industry. There is an existing masonry wall at Grid 28 separating these business entities.

We include BIW plans and Sebago Technics as being those permitted by the City this spring for reference to the overall project.

Thank you for your consideration.

Dana C. Sturtevant, P. E.
