

SECTION 02551 – NATURAL GAS DISTRIBUTION

All work and materials shall conform to MDOT DIVISION 200 – EARTHWORK.

The CONTRACTOR shall be responsible for the excavation, bedding, preparation, and backfilling of all trenches and all related earthwork associated with the installation of natural gas distribution mains and services as depicted in the project drawings. CONTRACTOR shall coordinate activities with NORTHERN UTILITIES for the installation of natural gas mains, services and all associated appurtenances.

NORTHERN UTILITIES or sub-contractor to NORTHERN UTILITIES shall provide natural gas mains, services and all associated appurtenances up to and including meter and regulator. CONTRACTOR shall provide all natural gas piping and appurtenances above grade beyond meter and regulator. NORTHERN UTILITIES shall provide all natural gas piping and appurtenances below grade after the meter. CONTRACTOR shall abide by the standards and specification of NORTHERN UTILITIES.

Record neatly in a permanently bound construction activity notebook and submit at Substantial Completion. Provide access to records for RESIDENT at all times. Submit copies to RESIDENT on a weekly basis.

Refer to SECTION 01025 – MEASUREMENT AND PAYMENT for information related to allowance for work performed by NORTHERN UTILITIES.
