

10/10/97

Approved w/ following conditions:

I. DESCRIPTION OF PROJECT

Cable Tray to be installed so as not to cover an 7' partial of Radisson sign. DH

Describe in a separate paragraph each type of proposed exterior architectural alteration, such as window replacement, roof replacement, porch alteration, repointing of masonry, or new addition/construction. Briefly describe the feature or materials affected by the work and give the approximate date that it was constructed, if known. Describe in detail the proposed work and how it will impact the existing feature. Use as many items as necessary to cover all aspects of the project. If more space is needed, continue on a separate page. Reference work items to accompanying drawings or photographs.

Nextel Communications of the Mid-Atlantic, Inc. proposes to construct a telecommunications site at the Radisson Hotel in Portland, Maine. This project is designed to minimize the impact to the City and provide network coverage within the Portland area. Nextel is proposing to place up to twelve antennas on the penthouse of the hotel. Please see the attached diagrams and sample pictures of the proposed work.

Nextel's objective is to cover as much area from one site to mitigate the need for many antenna sites. This site will be a three sectored site. Two of the sectors will be mounted directly to the existing walls of the building and the third will be a ballast type mount. The antennas used in this project are panel type antennas. All of the corresponding radio equipment will be housed in a room on the ninth floor. The visual impact to the building will be minimal and will match the building.
