## BUILDING INSPECTION PERMIT

This is to certify that DACORTA MELODIE C / Winter Green has permission to build a four season sun room at 51 SUMMER PL

422 B045001

Permit Number: 051288

DEC - 7 2005

PERMIT ISSUED

CITY OF PORTLAND

provided that the person or persons, firm or corporation accepting this permit shall comply with all of the provisions of the Statutes of the City of Portland relating to the construction, maintenance and use of buildings and structures, and of the application on file in this department.

Apply to Public Works for street line and grade if nature of work requires such information.

Notification of inspection must be given and work on permit must be closed-in. A notice is required.

A certificate of occupancy must be procured by owner before this building or part thereof is occupied.

# MC<sup>2</sup> Wonderglass™ Construction

The performance of Four Seasons' MC<sup>2</sup> Wonderglass™ is protected by the use of state-of-the-art materials and construction techniques. To ensure your security and peace of mind, MC<sup>2</sup> Wonderglass™ excels in all the categories important to you, including strength, safety and longevity.

Layers Keeps Room Warmer in Winter Cooler in Summer  
Eight Glass Coolings

## Strength and Safety

MC<sup>2</sup> Wonderglass™ is made with tempered safety glass which is four times stronger than regular window glass to ensure its strength and your safety and security.

## Long Life and Energy-Efficiency Stainless Steel High-Tech Glass Spacers Ensure Trouble-Free Performance

Many insulated glass manufacturers use inexpensive, conductive aluminum as their standard spacer material between the lites of glass. This spacer can be cold and prone to condensation. Four Seasons uses a much stronger and thermally stable Stainless Steel edge spacer for the enduring strength of the glass and your comfort and safety. Then, to

maximize its benefits, Four Seasons bends the stainless steel into a continuous, extra-strong frame rather than using failure-prone corner keys like other manufacturers.

## Dual Seal Silicone for Double Protection

For your protection and to ensure years of trouble-free performance, Four Seasons uses not one, but two, seal systems to create its insulated glass unit. The glass and stainless steel spacer are bonded first with Polyisobutylene (PIB) as the primary seal and then, for added protection, a second layer of silicone for strength.

## PIB + Silicone = Extra Long Life

## Energy Efficient Construction Argon Gas for Superior Thermal Performance

MC<sup>2</sup> Wonderglass™ is designed and constructed as a super energy-efficient product from the ground up. To ensure trouble-free energy efficiency for a lifetime, MC<sup>2</sup> Wonderglass™ is not filled with argon gas after assembly, using leak-prone injection holes like other manufacturers, but is assembled in a "clean room" filled with argon gas — ensuring 100 percent argon gas filling and no holes to leak.

## Designed and Built to Last a Lifetime!

All this advanced technology creates Four Seasons MC<sup>2</sup> Wonderglass™, a product built to last a lifetime and backed with a warranty to match (see next page).

Similar project  
w/ same materials

Permits expire in 6 months, if the projects not started or ceases for 6 months.  
inspections as agreed upon

The Owner or their designee is required to notify the inspections office for the following inspections and provide adequate notice. Notice must be called in 48-72 hours in advance in order to schedule an inspection:

By initialzing at each inspection time, you are agreeing that you understand the inspection procedure and additional fees from a "Stop Work Order" and "Stop Work Order Release" will be incurred if the procedure is not followed as stated below.

A Pre-construction Meeting will take place upon receipt of your building permit.

Footing/Building Location Inspection: Prior to pouring concrete

Re-Bar Schedule Inspection: Prior to pouring concrete

Foundation Inspection: Prior to placing ANY backfill

Framing/Rough Plumbing/Electrical: Prior to any insulating or drywalling

Final/Certificate of Occupancy: Prior to any occupancy of the structure or use. NOTE: There is a \$75.00 fee per inspection at this point.

Certificate of Occupancy is not required for certain projects. Your inspector can advise you if your project requires a Certificate of Occupancy. All projects DO require a final inspection  
ADD If any of the inspections do not occur, the project cannot go on to the next phase, REGARDLESS OF THE NOTICE OR CIRCUMSTANCES.

NA CERTIFICATE OF OCCUPANCIES MUST BE ISSUED AND PAID FOR BEFORE THE SPACE MAY BE OCCUPIED
