BUILDING PERMIT INSPECTION PROCEDURES
 Please call 874-8703 or 874-8693 to schedule your
 inspections as agreed upon

~~Permits expire in 6 months, if the project is not started or ceases for 6 months.~~

The Owner or their designee is required to notify the inspections office for the following inspections and provide adequate notice. Notice must be called in 48-72 hours in advance in order to schedule an inspection:

By initializing at each inspection time, you are agreeing that you understand the inspection procedure and additional fees from a "Stop Work Order" and "Stop Work Order Release" will be incurred if the procedure is not followed as stated below.

A Pre-construction Meeting will take place upon receipt of your building permit.

- Footing/Building Location Inspection: Prior to pouring concrete *left*
- Re-Bar Schedule Inspection: Prior to pouring concrete
- Foundation Inspection: Prior to placing ANY backfill
- Framing/Rough Plumbing/Electrical: Prior to any insulating or drywalling
- Final/Certificate of Occupancy: Prior to any occupancy of the structure or use. NOTE: There is a \$75.00 fee per inspection at this point.

Certificate of Occupancy is not required for certain projects. Your inspector can advise you if your project requires a Certificate of Occupancy. All projects DO require a final inspection If any of the inspections do not occur, the project cannot go on to the next phase, REGARDLESS OF THE NOTICE OR CIRCUMSTANCES.

ALL CERTIFICATE OF OCCUPANCIES MUST BE ISSUED AND PAID FOR, BEFORE THE SPACE MAY BE OCCUPIED

Comments:

Tammy,
I have attached a plan showing the location of the forms for the foundation on the above noted project. The footing location was checked by me yesterday and the location of the foundation forms was staked out under my supervision.
As it is stated on the plan, the locations of each are inside the setback line and meet the ordinance by increasing the amount of the setback on the Island Street side.

Please give me a call if you have any questions.

Demolitions and Asbestos

To: Code Enforcement Officers and Municipal Officials
From: Ed Antz, Asbestos/Lead Hazard Prevention Program
Subject: Asbestos Issues During Building Demolitions
Date: September 2000

I) Overview

In Maine, building demolitions happen on a regular basis. Many of the demolitions occur in older buildings that are likely to contain some asbestos products, particularly in or on heating (HVAC), wall floor, and ceiling systems. These demolition projects may be happening without the proper protection of employees, the general public, and the environment. It is important to remember that state and federal laws require that owners have buildings inspected and have any asbestos products properly removed prior to demolition. The Maine DEP is forwarding this information to municipal officials in an effort to increase awareness of and compliance with applicable rules, resulting in less asbestos exposure to the general public, demolition site personnel, and the environment.

2) What Can Municipalities Do To Help?

Municipalities can greatly assist the people of Maine and the Department by joining with the DEP and the US EPA to ensure that asbestos is properly managed during demolitions. Specifically, municipalities can hand out appropriate information, issue demolition permits only to persons who can demonstrate that they will properly handle the asbestos, and mail or fax the building demolition (BDF) report form to the Department. The following check-off list can be used:

- (A) Provided "Asbestos Fact Sheet" to Applicant
- (B) Had applicant fill out "Building Demolition Form" (BDF)
- (C) Did not issue Demolition Permit to Applicant not answering "Yes" to three questions on BDF Form (OPTIONAL BUT SUGGESTED)
- (D) Municipality faxed (or mailed) BDF Form to DEP at 287-7826.

3) What Are The Rules?

Simply stated, state and federal asbestos rules and regulations require that buildings be inspected for asbestos products and have them removed prior to demolition. The inspection and removal operations must be performed by DEP-licensed companies under regulated and controlled conditions.

4) Using The Building Demolition Report Form

The purpose of this form is to ensure that an applicant has the correct information to properly remove asbestos from a building prior to demolition. The form asks three questions and records some basic information that the DEP may need during follow-up inquiries. The Form has two parts which need to be filled out by the applicant. The first section on the Form, Pre-Demolition Building Inspection and

Demolition Fact Sheet

Contact: phone (207)-287-2651

This Fact Sheet provides a brief overview of the regulatory requirements pertaining to asbestos demolition activities in Maine. This document addresses the basic requirements. Should you require detailed information or have a specific question, please call (207) 287-2651.

What is Asbestos?

Asbestos is a naturally occurring mineral, very strong and heat resistant, which has been made into nearly three thousand products. It is found on heating and domestic water systems (pipes, boilers, gaskets, tanks, elbows and tees), spray-on insulation (fireproofing and acoustical purposes), flooring components (vinyl tiles and linoleum) and drop-in ceiling systems (ceiling tiles). Asbestos-containing materials (ACM) are also found in building materials, such as siding (shingles or sheets) and roofing, used on the outside of buildings.

When do Maine's Asbestos Regulations apply?

Any (single) demolition activity that involves the removal of ACM in quantities greater than 3 square or 3 linear feet is subject to the requirements of 38 M.R.S.A. Title 38 Sections 1271 to 1284 (Maine statute) and Chapter 425, Asbestos Management Regulations (DEP regulation). Demolition means the tearing down or intentional burning of a building. This includes any institutional, commercial, public, industrial or residential building. Be advised that Maine and federal regulations require that all ACM be removed from a building (or affected portions thereof) before it is completely or partially torn down.

What are Maine's requirements?

Maine regulations require that notification of the demolition activity be sent to the Department 10 days prior to the activity; that companies performing the removal be licensed with the Department; that individuals working for the licensed companies be certified with the Department; that the work be performed under controlled conditions (specific work practices consisting of reduced pressure enclosures and wet methods) by properly protected employees; and that inspection, project design and clearance standards (air testing) be met. Finally Maine regulations require that asbestos be properly stored in fiber-tight containers, be transported by DEP-permitted vehicles, and be disposed in a landfill licensed to accept the type of waste generated (friable or non-friable).

What are the Federal Asbestos requirements?

The federal government under the National Emissions Standards for Hazardous Air Pollutants (NESHAPs) also regulates asbestos demolitions. Specifically, the NESHAPs requires that facilities be inspected thoroughly for asbestos products, that the owner/operator notify the federal government 10 days prior to the project, and that friable asbestos (any loose, crumbly material) be removed prior to demolition. The federal government and the Department have worked out an agreement that allows notification to the Department to constitute notification to the federal government as well. All demolitions, asbestos-containing or not, must be reported, excluding residential units (<5).

Simply, What Can I Do To Be In Compliance?

As soon as possible before demolition, building owners need to hire an asbestos consultant or asbestos contractor (with consulting experience) to inspect and make recommendations about demolition options. An up to date list of asbestos companies is available from the Department as is technical assistance following inspection.

Help save Maine fisheries - Remove and recycle mercury thermostats and fluorescent lamps from your building prior to demolition!

Date Submitted

Notification Submitted by: (please print)

asbestos survey performed by: (name & address) telephone:		demolition start date:	
asbestos inspection performed by: (name of licensed Asbestos Consultant) telephone:		demolition end date:	
property address:		property owner: (name & address) telephone:	
building description: <input type="checkbox"/> pre-1981 residential with 2-4 units <input type="checkbox"/> post-1980 residential with 2-4 units <input type="checkbox"/> other:		demolition contractor: (name & address) telephone:	

Were asbestos-containing materials found? yes no no inspection or survey required (post-1980 2-4 unit)

1) Building owners are required to provide this notification of the demolition of a building to the DEP at least 5 working days prior to the demolition. This notification is not required before the demolition of a single-family residence or related structure (e.g., garage, shed, barn). It is also not required if previous notification of the demolition has been provided to the DEP as part of an asbestos abatement project notification. Demolition means the tearing down or intentional burning of a building or part of a building.

2) Prior to demolition, building owners must determine if there is any asbestos-containing material(s) (ACM) in the building. An "asbestos inspection" by a DEP-licensed Asbestos Consultant is required for all buildings except single-family homes and residential buildings with 2-4 units built after 1980. In lieu of an asbestos inspection, pre-1981 residential buildings with 2-4 units can be surveyed to identify possible ACM by someone knowledgeable about ACM, such as a code enforcement officer or building inspector. If materials that may contain asbestos are found, then you can either assume they are ACM or hire a DEP-licensed Asbestos Consultant to test the materials.

3) Whenever more than 3 square feet or 3 linear feet of ACM is identified, the ACM must be abated in accordance with the Maine Asbestos Management Regulations by a DEP-licensed Asbestos Abatement Contractor. This includes materials presumed to be ACM. Check www.state.me.us/dep/wm/asbestos/index.htm for a listing of asbestos contractors.

Prior to issuing a local demolition permit, the DEP requests that municipalities have applicants for municipal demolition permits complete this form and fax it to the DEP at 207-287-7826. Municipalities should not issue local demolition permits if the required asbestos inspection or survey has not been performed and identified ACM removed.

Important Notice: Maine law requires the filing of this Building Demolition Notification Form prior to demolition of any building except a single-family home

BUILDING PERMIT INSPECTION PROCEDURES

Please call 874-8703 or 874-8693 to schedule your

inspections as agreed upon

Permits expire in 6 months, if the project is not started or ceases for 6 months.

The Owner or their designee is required to notify the inspections office for the following inspections and provide adequate notice. Notice must be called in 48-72 hours in advance in order to schedule an inspection:

By initializing at each inspection time, you are agreeing that you understand the inspection procedure and additional fees from a "Stop Work Order" and "Stop Work Order Release" will be incurred if the procedure is not followed as stated below.

Pre-construction Meeting: Must be scheduled with your inspection team upon receipt of this permit. Jay Reynolds, Development Review Coordinator at 874-8632 must also be contacted at this time, before any site work begins on any project other than single family additions or alterations.

Re-Bar Schedule Inspection:

Prior to pouring concrete

Footing/Building Location Inspection:

Prior to pouring concrete

Foundation Inspection:

Prior to placing ANY backfill

Framing/Rough Plumbing/Electrical:

Prior to any insulating or drywalling

Final/Certificate of Occupancy: Prior to any occupancy of the structure or use. ~~NOTE: There is a \$75.00 fee per inspection at this point.~~

Certificate of Occupancy is not required for certain projects. Your inspector can advise you if your project requires a Certificate of Occupancy. All projects DO require a final inspection.

If any of the inspections do not occur, the project cannot go on to the next phase, REGARDLESS OF THE NOTICE OR CIRCUMSTANCES.

CERTIFICATE OF OCCUPANCIES MUST BE ISSUED AND PAID FOR, BEFORE THE SPACE MAY BE OCCUPIED

PENALTY FOR REMOVING THIS CARD

Director - Building & Inspection Services

Deanne Bowke 12/10/03

Please call 874-8703 or 874-8693 to schedule your inspections as agreed upon

Permits expire in 6 months, if the projects not started or ceases for 6 months.

The Owner or their designee is required to notify the inspections office for the following inspections and provide adequate notice. Notice must be called in 48-72 hours in advance in order to schedule an inspection:

By initialzing at each inspection time, you are agreeing that you understand the inspection procedure and additional fees from a "Stop Work Order" and "Stop Work Order Release" will be incurred if the procedure is not followed as stated below.

A Pre-construction Meeting will take place upon receipt of your building permit.

Footing/Building Location Inspection: Prior to pouring concrete

Re-Bar Schedule Inspection: Prior to pouring concrete

Foundation Inspection: Prior to placing ANY backfill

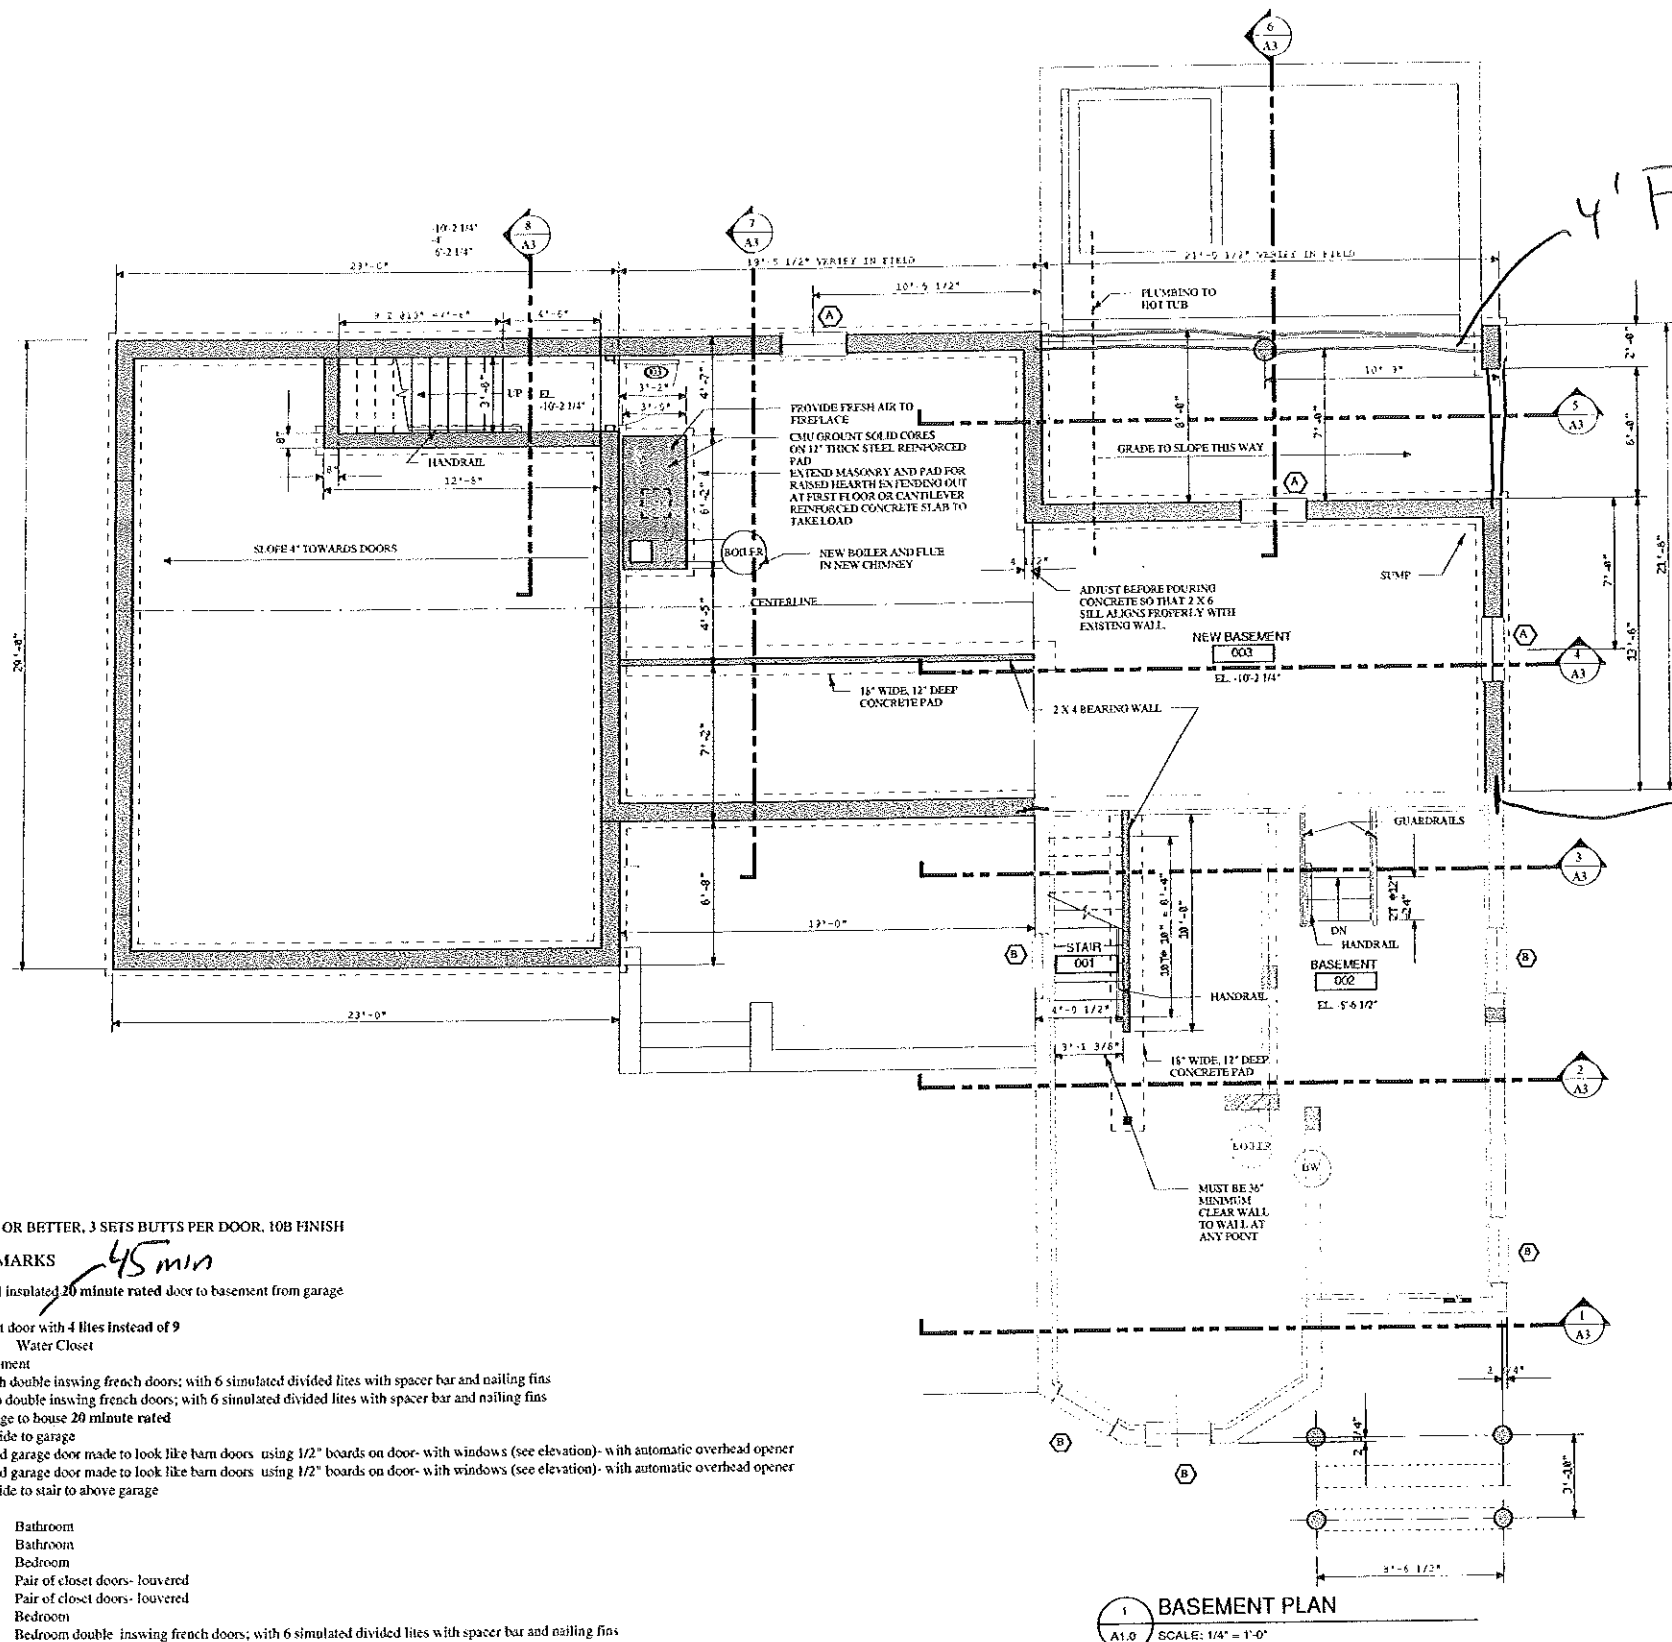

Framing/Rough Plumbing/Electrical: Prior to any insulating or drywalling

Final/Certificate of Occupancy: Prior to any occupancy of the structure or use. NOTE: There is a \$75.00 fee per inspection at this point.

Certificate of Occupancy is not required for certain projects. Your inspector can advise you if your project requires a Certificate of Occupancy. All projects DO require a final inspection. If any of the inspections do not occur, the project cannot go on to the next phase, REGARDLESS OF THE NOTICE OR CIRCUMSTANCES.

X CERTIFICATE OF OCCUPANCIES MUST BE ISSUED AND PAID FOR, BEFORE THE SPACE MAY BE OCCUPIED

Signature of Applicant/Designee: *Thomas Callahan*
 Signature of Inspections Official: *Donna Martin*
 Date: 11/20/06
 Date: 11/20/06
 Building Permit #: 061322
 CBL: 1317081

4' Frost wall for deck
