MEMORANDUM FROM DEPARTMENT OF BUILDING INSPECTION, PORTLAND, MAINE

January, 1971

Location: #49-51 Morning St.

Before tanks and piping are covered from view, installer is required to notify the Fire Dept. Headquarters of readiness for inspection and to refrain from covering up until approved by the Fire Dept. Headquarters

These tanks of (1) 2020 gallons capacity are required to be of steel or wrought iron no less in thickness than #7 gauge; and before installation are required to be protected against corrosion, even though galvanized, by two coats of tar, asphaltum, or other suitable rust-resisting paint, and special protection wherein corrosive soil such as cinders or the like.

Pipe lines connected to underground tanks, other than tubing and except fill lines and test wells, must be provided with double swing joints arranged to permit the tank to settle without impairing the efficiency of the pipe connections.

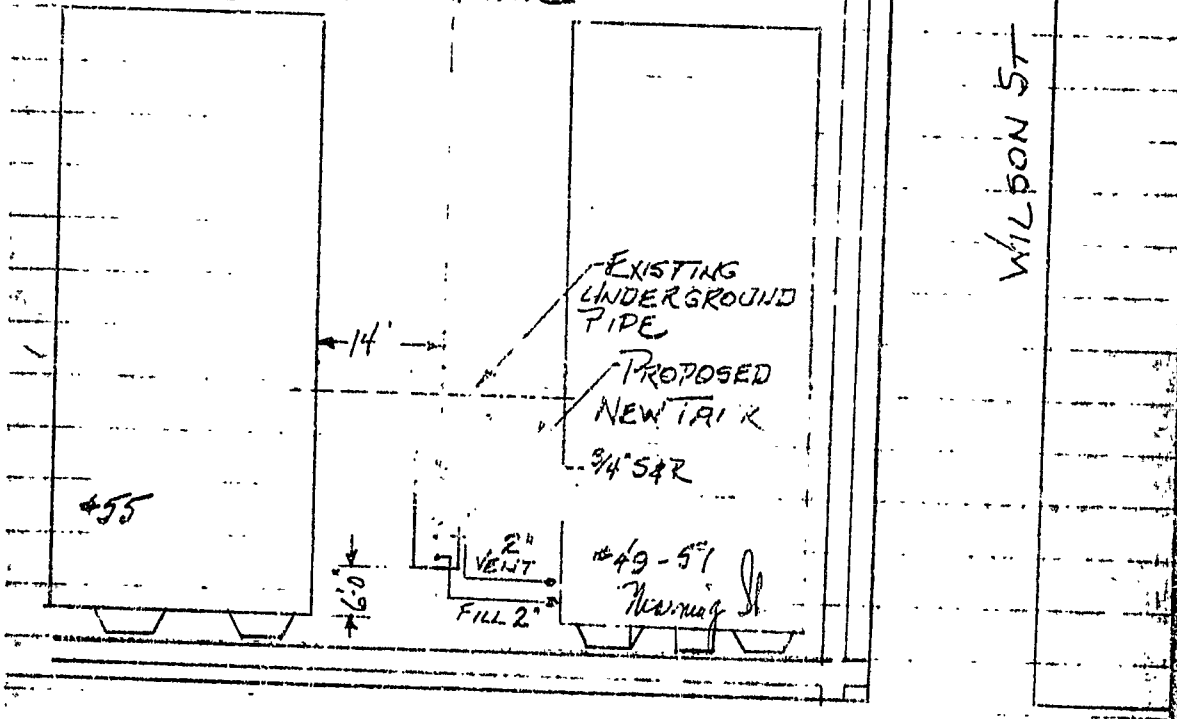

Owner and installer will have to bear the responsibility for the structural capacity of the tank to support loads from above such as heavy motor trucks.

If tank will be so located as to be subjected to the action of tide water or "ground" water, adequate anchorage or weighting must be provided to prevent "floating" when tank is empty or nearly so.

MEMORANDUM FROM DEPARTMENT OF BUILDING INSPECTION, PORT
55 Morning Street--Installation of automatic fire alarm system
Plumser installed by Milliken Bros

When such a system has been installed, the owner and lessee of the building are responsible for keeping the system in working order at all times so that the system may always be on guard to warn the occupants of the building in case a fire starts. To discharge this responsibility and to have good assurance that he will not be held either financially or criminally liable in case of injury or loss of life in his building due to fire, it is my belief that the owner and lessee must see to it that the alarm system is tested every twenty-four hours. This may be done by merely pressing very briefly the test button to see if the bells ring loud and clear.

Most of these systems have dry batteries for their power, and the batteries will deteriorate in time so that they will not ring the alarm bells satisfactorily, if at all. If the batteries are used briefly by this test every day, they will last longer than when tested less frequently.

Because this is a safety device whenever it is found that the bells do not ring loud and clear or any other defect appears in the system, the owner or his agent should notify immediately some predetermined party who has agreed in advance to come at once and service the system, whether day or night, Sundays or holidays.

It is recommended that the name of such a party and the address and telephone number be posted permanently on or in the control box of the system.

WMcD/H
CC: Mr. Philip Plumser
140 Eastern Promenade

(Signed) WARREN McDONALD
INSPECTOR OF BUILDINGS

CITY OF PORTLAND, MAINE
Department of Building Inspection

(date) May 2, 1951

To: Oliver T. Sanborn
Chief of the Fire Department

Location: 49-51 Morning Street Philip Plummer
55 Morning Street

From: Warren McDonald
Inspr. of Bldgs.

Subject: Application for permit for
improvements at above location,
required by order of Chief of Fire
Department dated May 10, 1949

While our two departments have done a good job of coordination under the Safety Ordinance--yours issuing the orders after inspection and ours issuing permits for improvements to be made,--

The confusion on the part of many people, who come in here, as to who has ordered them to do what,

The fact that on some jobs a permit has been issued, and the work done, only to have your inspector find that the situation did not then satisfy your order under the law,

And, the fact that you are permitted under the Building Code to exercise discretion as to details of means of egress in an existing building where there is no substantial increase in number of persons accommodated, while we must proceed under the precise terms of the Code unless deviation in this connection is approved by yourself--

leads me to the belief that each situation ought to be checked before any permits are issued, presumably by the inspector in your department who made the inspection on which the original order was based, to see:

1. If the work contemplated will completely satisfy the order.

2. To see, if possible, whether or not there may be some more economical way of satisfying the order, and, if so, to recommend that way to the owner.

To that end there is attached for your consideration applications for permits at the above location.

Remarks relating to this particular job:

Permits for two separate buildings covering automatic fire alarms for your approval. Will you be good enough to give special consideration to number, size and specific location of alarm gongs in each building, so that any special instructions or changes may be communicated to the installer and owner when the permits are issued.

Warren McDonald
Inspector of Buildings

MEMORANDUM FROM DEPARTMENT OF BUILDING INSPECTION, PORTLAND, MAINE
49-51 Morning Street-Installation of automatic fire alarm system for Philip
Plummer installed by Milliken Bros.

When such a system has been installed, the owner and lessee of the building are responsible for keeping the system in working order at all times so that the system may always be on guard to warn the occupants of the building in case a fire starts. To discharge this responsibility and to have good assurance that he will not be held either financially or criminally liable in case of injury or loss of life in his building due to fire, it is my belief that the owner and lessee must see to it that the alarm system is tested every twenty-four hours. This may be done by merely pressing very briefly the test button to see if the bells ring loud and clear.

Most of these systems have dry batteries for their power, and the batteries will deteriorate in time so that they will not ring the alarm bells satisfactorily, if at all. If the batteries are used briefly by this test every day, they will last longer than when tested less frequently.

Because this is a safety device whenever it is found that the bells do not ring loud and clear or any other defect appears in the system, the owner or his agent should notify immediately some predetermined party who has agreed in advance to come at once and service the system, whether day or night, Sundays or holidays.

It is recommended that the name of such a party and the address and telephone number be posted permanently on or in the control box of the system.

WMcD/H
CC: Mr. Philip Plummer
140 Eastern Promenade

(Signed) WARREN McDONALD
INSPECTOR OF BUILDINGS

CITY OF PORTLAND, MAINE

Department of Building Inspection

(date) May 2, 1951

To: Oliver T. Sanborn
Chief of the Fire Department

Location: 49-51 Morning Street
55 Morning Street

Philip Plummer

From: Warren McDonald
Inspr. of Bldgs.

Subject: Application for permit for
improvements at above location,
required by order of Chief of Fire
Department dated May 10, 1949

While our two departments have done a good job of coordination under the Safety Ordinance--yours issuing the orders after inspection and ours issuing permits for improvements to be made,--

The confusion on the part of many people, who come in here, as to who has ordered them to do what,

The fact that on some jobs a permit has been issued, and the work done, only to have your inspector find that the situation did not then satisfy your order under the law,

And, the fact that you are permitted under the Building Code to exercise discretion as to details of means of egress in an existing building where there is no substantial increase in number of persons accommodated, while we must proceed under the precise terms of the Code unless deviation in this connection is approved by yourself--

leads me to the belief that each situation ought to be checked before any permits are issued, presumably by the inspector in your department who made the inspection on which the original order was based, to see:

1. If the work contemplated will completely satisfy the order.
2. To see, if possible, whether or not there may be some more economical way of satisfying the order, and, if so, to recommend that way to the owner.

To that end there is attached for your consideration applications for permits at the above location.

Remarks relating to this particular job:

Permits for two separate buildings covering automatic fire alarms for your approval. Will you be good enough to give special consideration to number, size and specific location of alarm gongs in each building, so that any special instructions or changes may be communicated to the installer and owner when the permits are issued.

Warren McDonald
Inspector of Buildings

RECORD OF UNLABELED, SECOND-HAND, DOMESTIC OIL BURNER TO BE INSTALLED
IN THE CITY OF PORTLAND.

Name of Manufacturer ENTERPRISE OIL BURNER CO.

Type No. EP 4764 Year of Manufacture 1930

Poland Springs, ME 04274

RE: 55 Morning Street

Dear Sir:

It has been brought to the attention of this office that you are planning to change 55 Morning Street from rental housing to condominiums.

I would like to bring to your attention that under Article VII of the City of Portland, Maine's Land Use Code, a permit must be obtained to convert rental housing to condominiums.

The necessary application for this permit can be obtained in the Office of Inspection Services.

If you have any questions on this matter, please call this office.

Sincerely,

P. Samuel Hoffses
Chief of Inspection Services

PSH/kat
