CITY OF PORTLAND, MAINE
DEPARTMENT OF BUILDING INSPECTION

Portland Redevelopment Authority
389 Congress St.
Portland, Maine

September 12, 1961

Gentlemen:

With relation to permit applied for to demolish a building or portion of building at R. 25 West Cove St. it is unlawful to commence demolition until a permit has been issued from this department.

Section 6 of the ordinance for rodent and vermin control provides: "It shall be unlawful to demolish any building or structure unless provision is made for rodent and vermin eradication. No permit for the demolition of a building or structure shall be issued by the Building Inspector until and unless provisions for rodent and vermin eradication have been carried out under supervision of a pest control operator registered with the Health Department.

The building permit for demolition cannot be issued until the provisions of this section have been satisfied. It is the obligation of owner or demolition contractor or both to take up with the Health Department the matter of complying with this section, being prepared to inform that department what registered pest control operator is to be employed.

Very truly yours,

Albert J. Sears

Mr. Floyd Mace
19 West Cove Street
Portland, Maine

Subject: Application for permit to cover installation of warm air furnace in place of stove heat at 19 East Cove Street

I am not sure that you understand the considerable number of special requirements contained in the Building Law relating to the installation of such a furnace and the ducts connected with it, but I understand that you plan to install this heating system with your own hands. One of the requirements of law is that you shall not start the installation in any way whatever until you have the building permit card actually in your possession.

1. How far below the level of the present cellar floor do you propose to "pit" the furnace?

5. What will be the actual distance between the casing top of the furnace and the nearest woodwork overhead?

5. Of what material will the fresh air duct or pipe be?
Of what material the warm air ducts?

6. Will at least one of the warm air pipes be left without any closing or shut-off device?

September 14, 1943

Mr. Floyd Mace -----

7. Do you understand that warm air pipes or ducts must not be formed merely by closing over the spaces between wooden joists or studs?
8. Will all warm air pipes and outlet boxes or registers where concealed from view be covered with 14 pound asbestos?
9. Will all parts of pipes, ducts or boxes closer than one inch to burnable material be similarly covered with 14 pound asbestos?
10. If there are any wall registers as distinguished from floor registers, will you properly head-off the studs over the box and will you leave at least two inches air space between the top of the register box and the woodwork above it?

Very truly yours,

Inspector of Buildings

June 5, 1933

Mr. Leonard L. Stevenson
C/o Mr. Elwin Smith
Rear of 25 Cove Street
Portland, Maine

Dear Sir:

I am unable to issue the building permit to cover construction of a one story camp at the rear of the lot at 25 Cove Street because such a structure is not permissible to be built of wood in the Fire District for dwelling house purposes, and because the proposed building, which we are forced to classify as a dwelling house, would be located closer to the rear property line and the side property lines than is permissible under the Building Code.

I note that you have commenced the construction of the building, which, of course, is not legal. It will be necessary for you to remove what you have constructed and to refrain from erecting the building.

Please return the receipt for the fee of twenty-five cents (25¢) paid to this office, and your money will be refunded by voucher.

Very truly yours,

Inspector of Buildings.

Signature of owner _____

INSPECTION COPY

The image shows a dark, heavily textured surface, likely the cover or endpaper of an old book. The texture is grainy and uneven, with prominent horizontal lines running across the entire frame. There are numerous scratches, scuffs, and signs of wear, particularly along the right edge and in the center. The lighting is somewhat uneven, with the right side appearing slightly brighter than the left. The overall appearance is aged and worn.
