Building and Inspection Services Dept: Plumbing Inspection

Date: February 17, 1987
To: Munjoy South Apartments File
Fr: Raymond A. Hines, Regional Property Manager
Sj: Fire Damage Estimate
Re: Apartment 38, Munjoy South Apartments
Portland, Maine

Report Contents

1. Extent of Damage
2. Required Reconstruction/Replacement
3. Damage Estimate
4. Apartment Floor Plan

1. EXTENT OF DAMAGE

Major damage was sustained on the second floor. In Bedroom #2 (see diagram), where the fire began, the window was completely destroyed, as was the 2 x 4 wood framing, interior and exterior wall to a width of 7' and a height of 9' extending to the facier trim to the roof. Heavy heat, smoke and water damage was evident within that room.

Roof damage consisted of a 5' x 5' hole used to vent fire. Only minor structural damage could be found between the roof and attic. That damage consisted of three severed 2 x 4 rafter truss members. All structural members from the second floor stud plate to the ceiling joists seem to be intact and re-useable with the exception of the front wall in bedroom #2 as described above.

Bedrooms #2 and #3, the hall, and the bathroom also sustained heavy heat, smoke and water damage. All second floor windows were destroyed. Since the roof was vented and the ceilings opened up, the insulation in the attic was destroyed as was the insulation in the connecting apartment attic.

Damage on the first floor was confined to heavy water damage to the hard wood floor in the living room and water damage to the Kitchen and connecting hallway floors. No heat damage was in evidence on the first floor but smoke damage was sustained on all painted surfaces. All living room windows were destroyed during the fire fighting process.

RECEIVED
FEB 26 1987

DEPT. OF BUILDING INSPECTIONS
CITY OF PORTLAND

2. REQUIRED RECONSTRUCTION/REPLACEMENTS

- A. All sheetrock walls and ceilings on the second floor require complete replacement.
- B. All sub-floors and floors on the second floor level require replacement as well as the living room, kitchen and hall due to heavy water damage. The stair well area floors can be stripped and refinished.
- C. All electrical wiring, devices and fixtures require replacement on the second floor. All fixtures, switches and outlets require replacement on the first floor level due to smoke damage.
- D. All windows on the second floor require replacement. The living room windows require replacement on the first floor.
- E. All doors on the second floor require replacement.
- F. All wall and attic insulation must be replaced as well as the attic insulation in the adjoining apartment.
- G. All bath room fixtures as well as wall tile on the second floor must be replaced due to extreme heat and smoke damage.
- H. The hole in the roof must be closed and the truss repaired within the attic. The roof must be re-shingled.
- I. Re-studying, sheathing, shingling and a new facier must be installed to repair the damage to the front of the building.
