

### CITY OF PORTLAND, M. INE MEMORANDUM

To: George Flaherty, Asst. City Manager

DATE: 9-19-74

FROM: A. Allan Soule, Asst. Director Building & Inspection Services

SUBJECT: Cellar opening at 86 Anderson Street

Cur imspector, Hugh Irving, reports that, this callar opening has been filled in and topped off with about 6 inches of fine gravel meeting all of our requirements for filling in callar openings after demolitions. This work has been done by Santino Viola.

This is a complaint that both you and Neal Allen has referred to me, and I now feel that the job has been satisfactorily completed.

A. Allan Soule, Director, Building & Inspection Services

Charles Wood 86 Anderson Street Portland, Maine

Re: 86 Anderson Street

We recently made an inspection of the property owned by you at 86 Anderson Street, Fortland, Maine. As a result of the inspection, you are hereby ordered to correct the following substandard housing conditions:

## STAUCTURAL
Repair and put in good order all dilapidated and
hazardous parts of the structure as follows:
a. Point up the loss joints on the incide and
materials of the foundation

outside of the foundation.

Determine the reason and remody the condition which now causes the dampness in the collar of the structure.

Repair or replace the loose panels in the kitchen colling.

Install a private bath or shower conveniently located within the structure.

ELECTRICAL EQUIPMENT:
Check and have repaired all defective electric wiring and electrical equipment throughout the structure.

a. Install convenience outlets in the bedrooms

and kitchen of the structure.

The above mentioned conditions are in vicilation of the City Ordinance, MINIMUM STANDARDS FOR CONTINUED COCUPANCY, and AUTHORITY TO VACATE HILLDINGS, and must be corrected on or before April 16, 1960.

Very truly yours,

Douglas H. Brown, M. D. Health Director

Gordon E. Marian Housing Supervisor

RP 86 Anderson St..

February 19, 1953

Mrs. Clara Wood 86 Anderson St., Portland, Maine Copy to: Mr. William L. Vassar P. O. Box 453

Dear Mrs. Wood:

Referring to my letter to Mr. Vassar of February 18 relating to work done without a permit in your building o' 86 Anderson St., and my telephone conversation with your daughter this morning, Mr. Vassar came in about this difficulty this morning, and I have reached the following conclusion.

Our inspector reports that the chimney has been constructed in accordance with the requirements, though Mr. Vasnar failed to mention in his application for the permit that a new chimney was to be built.

The difficulty is the eight inch thick concrete block wall which he has built, also without a permit, in place of the combination wooden post and stone wall which was there before. Mr. Vassar says that he was unaware that a replacement like that required a permit, and that was why he did not include it in the permit that he applied for. Had he done so, we would have been able to tell him and you that the Duilding Code requires in such a case that the concrete block wall be at least 12 inches thick instead of the eight inches thick which he has made it. Thus, the correct wall could have been built for very little more money than the present incorrect one. To build the type of wall required by the Building Code now, however, would cost someone a great deal of money, and, under the circumstances it does not seem necessary to me that the wall be removed and replaced. However, it is your building, and it is your money which has paid for the wall now built, and I think you ought to understand the true uituation.

Mr. Vassar says he provided a footsing under the wall and that the wall only supports about a three foot depth of earth. This is favorable. It is to be borne in mind that a foundation wall like this has, besides the duty to support the building, the additional duty of retaining the earth outside of the celler so that it will not go into the cellar. To retain earth requires a certain strength. The Building Code merely says that in the average case the precaution should be made of making the wall 12 inches thick so as to avoid the possibility of the wall later on weakening and bulging or leaning inward at the top, due to the pressure of the earth on the outside.

If it is true that the present wall only supports a three foot depth of earth, it is quite likely that no trouble will ever ensue. Cartainly the wall that you have is far better than the one which it replace/1.

We have a case against Mr. Vassar and, of course, indirectly against you for the work having been done without a permit and for it having been done contrary to the requirements of the Building Code. If it is agreeable to you, we shall be content not to press this case. If on the other hand you are not entirely satisfied, I would be glad to have you contact me to see what can be done to adjust the situation so that you will be satisfied.

Very truly yours,

an-to A

File BP 86 Anderson St.

February 20, 1953

Board of Assessors

Warren McDonald Inspector of Fuildings

Work done without a permit at 86 Anderson St.

At this location we issued a permit to cover only demolition of the chimney may, but found cut that they contracted not only to demolish the old chimney but built a new chimney in its place, and more important replaced an old combination of wood and stone foundation wall with a new concrete block foundation nation of wood and stone foundation perhaps 18 or 20 feet.

It is doubtful if we will ever get a permit issued for this work, and I do not know as you would consider this any cause for addition to the valuation of the building, but it seems that you would be the ones to best decide about that.

Inspector of Buildings

WMoD/C

86 Anderson St. February 18, 1953 Well 2/25/53 Copy to: Clara Wood Mr., William L. Vassar 8ú Anderson St. P. O. Box 453 Portiland, Maino It is reported to us that you are the one who is respensible for having built a new chimney at 86 Anderson St. and having built a concrete block foundation well beneath a certain part of the building without having Deer Mr. Vussartsecured a permit from this department as required by law. If that is true, it is important that you come to this office and talk with a personally to explain what you will do to make good these violations before February 27th, 1953. If this is not done, we shall ask the assistance of the level described as the same of the level described as the same of the level described. of the legal department of the City to proceed against you for violation of the law without further notice. Our inspector reports that the new foundation wall of concrete blocks has been built along a section of the rear and a section of the side wall, and nas been built along a section of the rear and a section of the side wall, and that the wall is only eight inches thick, while the Building Code in such a that the wall is only eight inches thick, while the Building Code in such a case provides that such a wall of concrete blocks shall be no less than 12 inches thick. The Building Code also provides in Sect. 307c3.6 that the concrete built below grade shall be laid in coment mortar and that the wall shall have a concrete have only one unit through the thickness of the wall and shall have a concrete footing buneath the wall at least eight niches in depth. It would be best for you to decide before you come to the offine what you intend to do to make this wall comply with the law. It would also be well for you to telephone the office to make sure that I will be here when you arrive. Very truly yours, Warren McDonald Inspector of Euligings
