MEMORANDUM

TO: R. Lovell Brown, Building Inspector

FROM: George A. Flaherty, Assistant City Manager

SUBJECT: Garden Lane

DATE: 5/10/-3

Would you have one of your Building Inspectors contact Jack Thomas the City's Construction Supervisor at the Public Safety Building.

He has called to our attention to a building which appears to have a structural problem.

The reason for our concern is that we will be doing work in the area of this building with heavy equipment and Mr. Thomas feels that the work and the equipment could cause a serious problem.

Because public safety is concerned I would instruct you to have this building inspected immediately.

Thank you for your cooperation and assistance.

CITY OF PORTLAND, MAINE
MEMORANDUM

TO: A. L. Doria, 51 Park St.

DATE: June 15, 1956

FROM: Warren McDonald, Inspector of Buildings

SUBJECT: Installation of fuel oil storage tank at 117 Middle St.

Before tank and piping is covered from view, installer is required to notify Fire Department Headquarters of readiness for inspection and to refrain from covering up until approved by the Fire Department.

This tank of 5,000 gallons capacity is required to be of steel or wrought iron no less in thickness than $\frac{1}{2}$ -inch in thickness, and before installation is required to be protected against corrosion, even though galvanized, by two coats of tar, asphaltum, or other suitable rust-resisting paint, and special protection wherein corrosive soil such as cinders or the like.

Pipe lines connected to underground tanks, other than tubing and except fill lines and test wells, must be provided with double wing joints arranged to permit the tank to settle without impairing the efficiency of the pipe connections.

Owner and installer will have to bear the responsibility for the structural capacity of the tank to support loads from above such as heavy motor trucks.

If tank will be so located as to be subjected to the action of tide water or "ground" water, adequate anchorage or weighting must be provided to prevent "floating" when tank is empty or nearly so.
