File: Inquiry 104 Exchange Street

April 20, 1945

Oliver T. Sanborn
Chief of Fire Department

Subject: Inquiry as to use of some kind of
cleansing machine using "Varnolene" as a
cleansing agent, by Remington-Rand, Inc. at
104 Exchange Street, E. H. Rich, Manager.

Dear Chief Sanborn:

I have an inquiry from E. H. Rich manager of Remington-Rand, Inc. at 104 Exchange Street, stating that the company uses the basement for cleaning machines and that the fluid they use is "Varnolene" (highly inflammable).

The direct inquiry is: "Can mechanical blower system with fan installed in basement window be installed here to take out the fumes? This basement window is directly on Exchange Street."

Presumably this cleansing fluid is the same type used in clothing, and if so does not have a very low flash point. It would seem to me, however, that the room in which the cleaning agent is used would have to be classified as a hazardous room and on that basis should be separated from the rest of the building by one-hour fire resistance. As for the venting, I should not think that it ought to be discharged onto the public sidewalk unless a considerable distance above the sidewalk.

If this is a new proposition, I think the Building Code would require that a fire resistive room be provided now with a ventilating facility and other apparatus such as electrical equipment properly protected as recommended by the National Board subject to your approval. If, however, this practice is of long standing, I am afraid the Building Code does not require the enclosure or anything else, but perhaps you can do so under the head of a dangerous and inflammable condition as controlled by the state law.

If this were a cleansing room for clothing, of course, the Building Code would forbid it in a building of this type of construction anyway and would also forbid its being in the basement.

Perhaps you will prefer to go over the matter with Mr. Rich direct, but will you be kind enough to let me know whatever your conclusions are?

Very truly yours,

Inspector of Buildings

WMD/L

4/20/45 - Chief Sanborn, said this is allowable.
Sanborn on cleaning machine. P.M.

104 Exchange St.
E. H. Beck - Burlington Plant, Inc.

4/21/47
Frank

"Vanolene" has been used by this company for cleaning typewriters, for about a year.

Typewriter parts are put into a former beverage can, lined with metal, where there is about 2 gals. or more of "Vanolene". After this operation the parts are put into a pan about 2 1/2" high and about 19" square. This pan sets on a "canned" metal, round, heavy, about 6" long and 9" on the sides and feet. The back is against a wooden partition.

A compressed spray gun, under a 50 lb. pressure with a flash tube attachment (cleaner) the Vanolene, when the pressure of the air rises, and in turn, is blown on to the parts to be cleaned. This process is what makes the vapor, this vapor being the reason for a blow.

This work is being done in the basement, which has a concrete floor and about 30' x 45'. The basement has one exit door leading to the first floor where the office is. Another door comes out to the first floor beside the elevator to the building and main repair shop.

The basement is used for storage along with this cleaning of parts. A wooden partition separates this part of the basement from the boiler room (not enclosed). One can reach this from the boiler room to the front part of the basement when this work is going on. The depth of the basement is about 190'.

The exit for this blow-out must come over the side wall, (Exchange St. level).

"Vanolene" is kept in a gallon jug. About 2 1/2 gallons are used at a time. Altho this beverage coffee had at least 2 gallons, this had a cover. Spray gun is used for about 10 minutes at a time. I did not talk to Mr. Beck.

Contractor's name and address B. Kroot, 106 Congress St. Telephone 2-5545
Architect _____ Plans filed yes No. of sheets 1
Proposed use of building offices, and janitor's apt. 4th floor No. families 1
Other buildings on same lot _____ Fee \$ 1.00
Estimated cost \$150.

Description of Present Building to be Altered

Memorandum from Department of Building Inspection, Portland, Maine
102 Exchange St. --Alterations for Nathan Silverman by B. Kroot, Builder--1/20/42

To Owner and Builder:

Since there is to be no outside window in the kitchenette, the area of the kitchenette is not permitted to be more than 70 square feet. This room then requires a ventilating duct of non-burnable material at least 50 square inches in area and to extend far enough above the roof to prevent clogging by snow.

Ventilation of the inside toilet room is covered by health regulations out of the jurisdiction of this office but enforced by the Plumbing Inspector.

cc Mr. B. Kroot, 106 Congress St.

(Signed) Warren McDonald
Inspector of Buildings

WRITTEN CONSENT AND AGREEMENT RELATING TO A CERTAIN SIGN PROPOSED
TO BE ERECTED PROJECTING OVER A PUBLIC SIDEWALK FROM THE PREMISES
AT 102 Exchange St IN PORTLAND, MAINE

Robert Willis being the owner of the premises
at 102 Exchange St. in Portland, Maine hereby
gives consent to the erection of a certain sign owned by
Maine Printing Business Forms projecting over the public
sidewalk from said premises as described in application to the
Inspector of Buildings of Portland, Maine for a permit to cover
erection of said sign;

And in consideration of the issuance of said permit
Robert Willis, owner of said premises,
in event said sign shall cease to serve the purpose for which
it was erected or shall become dangerous and in event the owner
of said sign shall fail to remove said sign or make it permanently
safe in case the sign still serves the purpose for which it was
erected, hereby agrees for himself or itself, for his heirs,
its successors, and his or its assigns, to completely remove
said sign within ten days of notice from said Inspector of
Buildings that said sign is in such condition and of order from
him to remove it.

In Witness whereof, the owner of said premises has signed this
consent and agreement this 15th day of
Dec 1983.
