Gentlemen:

On October 3, 1972, one of your inspectors told one of our mechanics on the job that the combustion air louvre in the window of the boiler room was not large enough.

The building is to be occupied by Eastern Fire Equipment Company and is located at 179 Commercial Street, Portland.

The louvre is 12"x12" and opens to out of doors. According to Maine Code Paragraph 1407, Page 24, ten (10) square inches per gallon of oil per hour is the required area. This burner will fire six (6) gallons per hour, so that 60 square inches is needed. Allowing for 60% free area the 12"x12" louvre should be acceptable.

Hoping that this clarifies the matter, we remain

Sincerely yours,
