June 24, 1927

J. A. Driscoll 63 Alder Strest Portland, Maine

Dear Sir:

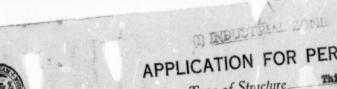

Referring to your application for a building permit to erect a one story piazza attached to your dwelling house at 63 Alder Street, your location plan shows that the proposed piazza would be 2feet from your side lot line. The Building Code requires that there be at least 4 feet between this piazza and your side lot line.

If you will come to this office and change the dimension upon your location plan and the size of the plazza correspondingly to show that the construction will be at least 4 feet from the side lot line, the permit may be issued. If, however, you conclude that you will not proceed with the work and will return the receipt for the fee paid to this office on or before June 29th, 1927, your money will be refunded.

Yours truly,

Inspector of Buildings

WIL/EP

Memorandum from Department of Building Inspection, Portland, Maine 63 Alder St. --- Construction of first story open rear platfor m by and for Joseph A. Driscoll-- 8/21/45

You have now changed the application to cover only an open platform with railing around it and steps to the ground, on the bar that you may ask for the special right from the Municipal Officers later on to build one enclosure of the porch. You must have in wind that this negative days the company that the result is such for the company that the state of the porch. bear in mind that this permit issued for the open platform does not give you the assurance that you can later build the exclosing walls of porch closer to the lot line

I understand that the 4x6 sills are to be set with the 6-inch dimension upright, that the floor joists are to bear on the tops of the sills or on no less than 2x3 nailing strips spiked to the sides of the sills; that you are to provide three cedar posts along the front of the platform, equally spaced, and that the posts are to extend at least 4 feet below the surface of the ground. (Signed) Warren McDonald

It is understood that this permit does not include installation of heating apparatus which is to be taken out separately by and in the name of

INSPECTION COPY

HIA PRMT PH AJS HL BS AP 63 Alder St.-I August 10, 1345 Subject: Application for building permit to cover construction of open porch at the side of dwelling house at 65 Alder Street Wr. Joseph A. Driscoll 63 Alder Street Since your property is located within the limits of Fire Mstrict No. 1E, I. hat the English Code will not allow the construction of the coord alanes in find that the Building Code will not allow the construction of the porch closer than five feet to the side property line. You have appeal rights seeking a wrience from the Municipal Officers acting as a Board of Appeals since the proposition represents Portland, Maine Tive feet to the side property line. You have appeal rights seaking a verience from the Municipal Officers acting as a Board of Appeals since the proposition represents an addition to a building within the limits of Fire District. That you can try if you wish, but I cannot predict what the results would be. If you desire to try such you wish, but I cannot predict what the results would be. It you desire to try such an appeal and will notify me, I will tell you how to do it. As I understand the proposition, you want to build an open porch with roof, over it 6' or by 8' 3" and then between that porch and the side lot line a small platform without roof but with steps to the ground. The platform without a roof platform without roof but with steps to the ground. The building Gode you would not could be built out to the property line but under the building Gode you would not be able to build a roof over the platform or to enclose it. be able to build a roof over the platform or to enclose it. Under these diremetances I cannot issue the permit, and if you do not wish to try a variance appeal, and will return the receipt for the fee paid to this office not later than August 23, 1945, the money will be refunded by voucher. I note that you have given the estimated cost as \$50. The Building Code requires that this estimated cost shall include everything—all labor and naterial, in be cluding meterial that the owner may have on hand, any sec nd hand matter and material that the owner may have on hand, any sec nd hand matter and material that the owner may have on hand, any sec nd hand matter and material, in cluding the owner may have on hand, any sec nd hand matter to be construction work if the astimate or cost were and labor as the latter to be construction work if the astimate or cost were and labor as the latter to be construction work if the astimate or cost were and labor as indicated in the law. Therefore, if you intend to try the appeal, if is necessary that you include everything in this estimated cost as indicated herein and furnish that you include everything in this estimated cost as indicated herein and worked out.

This is not to be guassed at but a logical estimate should be worked out. Inspector of Bullat WMcD/S

September 10, 1957

3. You have indicated all of the floor joists as being 2x6, and they must be spaced not more than 18 inches from center to center. The joists must be supported on the sills, either on the top edge of the sills or upon no less than 2x3 nailing strips spiked to the inner face of the sills so that the bottom edge of the 2x3 is flush with the bottom of the 4x6 sill. Then, the joists should be notched over the nailing strips.

4. It is noted that on your sketch you say "to repair existing piazza". It is most doubtful if you can repair the existing piazza without rebuilding it. Therefore, the permit is given only on that basis that it will be rebuilt. However, there is no objection to using sound material, if it is the right size.

Very truly yours,

WMcD/B

Warren McDonald Inspector of Buildings

Saptember 10, 1957

AP 63 Alder St. -- Reconstruction and extension of existing first story platform

Mr. Joseph A. Driscoll 63 Alder St.

Dear Mr. Driscoll,

Permit for the above work is issued to you, herewith, but subject to the conditions which follow. If these conditions are not understood, or, if you are unwilling or unable to comply with them, it is important that you do not start the work but that you contact this office with further information to show compliance with the Building Code and Zoning Trdinance.

1. Your application indicates that all you propose is a small addition to the platform, leaving the steps as they are, but examination of the existing platform shows that it is neither strong enough or in good enough shape to be left by it is. Therefore, the negmin is issued on the basis that to be left as it is. Therefore, the permit is issued on the basis that you are to rebuild the existing platform somewhat as shown on the sketch and which will, no doubt, mean replacing the wooden steps also. Since you apparently have given us the only plan which you have, it is important that you realize that the ou should come to the office and copy it so that you will not to wrong. The permit is issued based on the plan, and if you plan indicates that the addition will be six feet measured out from the house and will overlap the steps in their existing location. It is not allowable to make the rebuilt existing platform the six foot depth and then run the steps out closer to the side property line than they are now. It would be allowable to reconstruct the present platform of the same depth--six feet--as the proposed addition and then ran the steps down toward the street.

2. You have not given complete framing information with regard to foundations or framing, and it is important that you note the following. All of the sills are required to be no less than 4x6 solid lumber, not wilt up of 2x6s. This will mean a solid 4x6 along the six foot depth of the extension toward Alder St.; the same along the end of the extension; the same from the outer corner of the extension farther from the street to the face of the existing platform at the top of the steps and then the same kind of solid 4x6 across the face of the existing platform to the ell. There is no objection to running the 4x6 the full length of the addition to the platform on the side farther from Alder St. if you so desire. However, it will be necessary to have a cedar post foundation extending no less than four feet below the surface of the ground under all of the outer corners and also under the place where the face of the existing platform joins the side of the extension. Cedar posts will also be necessary where the sill of the addition joins the main house and where the sill under the face of the existing platform joins the ells, unless you are able to support these sills upon the existing construction of main house and ell.
