SHACK WALKER

First cut # 920R / Half cut # 9202R / Third cut # 9203R / Fifth cut # 9204R

CITY OF PORTLAND, MAINE  
BUILDING AND INSPECTION SERVICES

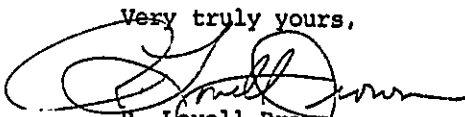

DATE Jan. 17, 1978

TO: Santino J. Viola  
12 Frost Street

With relation to permit applied for to demolish -----  
2 family dwelling belonging to Arrow Realty  
at 38 Cedar Street, 85 Preble St.  
it is unlawful to commence demolition work until a permit has been issued from this department.

Section 6 of the Ordinance for rodent and vermin control provides, "It shall be unlawful to demolish a building or structure unless a provision is made for rodent and vermin eradication. No permit for a demolition of a building or structure shall be issued by the Building and Inspection Services Department until and unless provisions for rodent and vermin eradication have been carried out under supervision of a pest control operator registered with the Health Department."

The building permit for demolition cannot be issued until the provisions of this section have been satisfied. It is the obligation of owner or demolition contractor or both to take up with the Health Department the matter of complying with this section, being prepared to inform that department what registered pest control operator is to be employed.

Very truly yours,  
  
R. Lovell Brown  
Director

Health Department comments: Building Found to be free of  
RODENTS AND OTHER VERMIN AT THIS TIME

A large section of the document is a grid of horizontal lines, divided into two columns by a vertical line. The top portion of this grid contains some faint, illegible markings and a large, hand-drawn scribble that spans across the top of both columns. The rest of the grid is mostly empty, with some very faint, scattered marks.

CITY OF PORTLAND, MAINE  
DEPARTMENT OF BUILDING INSPECTION

CONCRETE CONSTRUCTION IN COLD WEATHER

A recent proposal by a contractor to pour concrete with the temperature at 20 degrees and a forecast of sub-zero that night--without sufficient plans to keep the concrete from freezing--compels this department to adopt a realistic attitude toward the Code provisions that:

- (1) Approval of this office is required before concrete may be mixed or placed at time of freezing or near-freezing temperatures.
- (2) Full description of precautionary measures shall be made to us before our approval is given;

but at the same time we do not want to discourage all concrete work in cold weather, nor do we desire to make the process of approval unduly cumbersome. However, we do hope for sufficient record here in each case, so that, should defective concrete due to frost action be found, the parties responsible may be determined.

Acceptable methods of protecting concrete are too dependent upon varying conditions to be simply defined. The standards set by the Code are those established by American Concrete Institute, requiring that:

1. No frozen materials or materials containing ice shall be used.
2. Ground with which concrete will come in contact, and all forms, reinforcement, ties and fillers shall be free from frost.
5. When air temperature at time of "pouring" is below 40 degrees F:
  - 3.1 Concrete, when placed in forms, shall be between 60 and 90 degrees F.
  - 3.2 After placing, concrete shall be maintained at not less than 50 degrees F. for at least 72 hours and longer if deemed necessary.
  - 3.3 Covering or other protection shall remain in place and intact for at least 24 hours after artificial heat is discontinued.
4. No dependence shall be placed on salt or other chemicals to prevent freezing.

When ready-mixed concrete is used, No. 1 will no doubt be cared for by the manufacturer. The other features must be the responsibility of the party in charge of the work. Before approval is given, we shall expect him to come to the office and furnish a written statement, signed by an authorized person, showing the particular protective methods he proposes and also agreeing to meet the above general provisions.

It is evident that some type of covering for all of the concrete will be needed whenever placement is to be done with air temperature below 40 degrees F. At some point, especially if the prospects are for "falling temperature", artificial heat will be needed to maintain the conditions stipulated above. It will be up to each contractor to make his own decision as to what to offer; not to look to this department to tell him the least he can get approval on.
