SI/2274-1

Copy to Mr. A. L. Goole-11 Grassmore Road
November 6, 1931

Mr. A. F. Hanson
254 High Street
Portland, Maine

Dear Sir:

Upon inspection of the steam heater which you have installed for
A. L. Goole at 371 Cumberland Avenue, we find that the installation is
not in accordance with the information given in the application for the
permit, and that it does not comply with the Building Code for safety.

Instead of this heater being supported upon a concrete floor
as indicated in the application, it sits upon a solid concrete slab
which in turn rests upon a wooden floor. Such an arrangement is not
permissible, and I believe unless such proceedings can be shown to be
possible, that the wooden floor should be removed and the concrete
foundation carried down to the natural soil of such an area that it
will extend at least two feet in front of the heater and one foot on
both sides and the back.

Your application states that the sides and the back of the
heater would be at least three feet from any combustible material.
The inspection shows that the side of the heater is only about
twelve inches from the woodwork in a partition. Hence you have
stated in the application that the front of the heater would be
four feet from any combustible material, it appears to be only
3'4" from the woodwork of a partition.

It should be obvious to you that the purpose for giving
a permit for such an installation is to see to it that the installa-
tion of the heater is made in a safe manner, and you are in violation
of the Building Code if you give us incorrect information on the applica-
tion, or if you make the installation itself contrary to the terms of the
Building Code.

You are hereby directed to have all the details of this installa-
tion made to comply with the Building Code and before November 27, 1931,
or we shall find it necessary to take appropriate steps to see that the
law is complied with.

Very truly yours,

W/BC

Inpector of Buildings.
