APPLICATION FOR PERMIT FOR HEATING, COOKING OR POWER EQUIPMENT

PERMIT ISSUED

JUL 23 1981

Portland, Maine, July 22, 1981

CITY OF PORTLAND

To the INSPECTOR OF BUILDINGS, PORTLAND, ME.

The undersigned hereby applies for a permit to install the following heating, cooking or power equipment in accordance with the Laws of Maine, the Building Code of the City of Portland, and the following specifications:

Location 45 Casco St. Use of Building school No Stories Building Existing "
Name and address of owner of appliance City of Portland 400 Presumpscot
Installer's name and address Mechanical Services, Inc. Telephone 774-1531

General Description of Work

To install replacement burner in existing boiler

IF HEATER, OR POWER BOILER

Location of appliance boiler room Any burnable material in floor surface or beneath? no
If so, how protected? Kind of fuel? oil
Minimum distance to burnable material, from top of appliance or casing top of furnace
From top of smoke pipe From front of appliance From sides or back of appliance
Size of chimney flue Other connections to same flue
If gas fired, how vented? Rated maximum demand per hour
Will sufficient fresh air be supplied to the appliance to insure proper and safe combustion?

IF OIL BURNER

Name and type of burner Carlin Labelled by underwriters' laboratories? Yes
Will operator be always in attendance? Does oil supply line feed from top or bottom of tank?
Type of floor beneath burner Size of vent pipe
Location of oil storage Number and capacity of tanks
Low water shut off Make No
Will all tanks be more than five feet from any flame? How many tanks enclosed?
Total capacity of any existing storage tanks for furnace burners

IF COOKING APPLIANCE

Location of appliance Any burnable material in floor surface or beneath?
If so, how protected? Height of Legs, if any
Skirting at bottom of appliance? Distance to combustible material from top of appliance?
From front of appliance From sides and back From top of smokepipe
Size of chimney flue Other connections to same flue
Is hood to be provided? If so, how vented? Forced or gravity?
If gas fired, how vented? Rated maximum demand per hour

MISCELLANEOUS EQUIPMENT OR SPECIAL INFORMATION

Amount of fee enclosed? \$15.

APPROVED:

Will there be in charge of the above work a person competent to see that the State and City requirements pertaining thereto are observed?

**CITY OF PORTLAND, MAINE**

**FIRE DEPARTMENT**

**TO:** Mr. Albert J. Sears, Building Inspector

**DATE:** August 24, 1964

**FROM:** Haswell M. Bruns, District Chief

**SUBJECT:** Installation of mechanical ventilation at 39-45 Casco Street

The proposed exhaust pipe system for the automotive shop at 39-45 Casco Street is approved by this office.

I gather that this system was in use at Portland High School and had the Fire Department approval.

The fan discharge is to extend above the existing roof and away from all combustibles and openings.

CITY OF PORTLAND, MAINE  
MEMORANDUM

cc to: Fire Department  
cc to: Acting City Manager

DATE: March 2, 1962

TO: Calvin E. Eells, Curriculum Coordinator, School Dept.

FROM: Albert J. Sears, Building Inspection Director

SUBJECT: Recommendations relating to establishment of Welding School in basement of Walker Manual Training School.

As a result of the recent inspection of this building with you and Capt. Flaherty of the Fire Department, it is recommended that, before welding school operations are established in the building, the following may be done:

- 1- Remove all wooden floor construction in the area involved, as planned.
- 2- Provide a ceiling of at least one-hour fire resistance over this entire area.
- 3- Eliminate as many openings as feasible in the masonry wall separating the area involved from the rest of the basement and install at least Class "C" labelled fire doors on any openings which are left.
- 4- Separate heater, including fuel storage spaces, from rest of building with partitions of at least one-hour fire resistance. Eliminate as many as possible of the existing openings into the heater room area and have all entrances to the heater room if possible from other than the welding area. Install at least Class "C" labelled fire doors on all openings to heater room from inside the building.
- 5- Provide a satisfactory second means of egress from the first story at the rear of the building.
- 6- Provide a door not less than three feet nor more than four feet wide equipped with at least a vestibule hatch set or equivalent to serve as an emergency means of egress from the rear of the welding area.

Installation of welding equipment will, of course, need to be made in accordance with standards of the National Fire Protection Association and to the satisfaction of the Fire Department. If heavy equipment is to be installed in the first story to be used in connection with other vocational training courses, adequacy of existing floor framing to support the loads involved will need to be investigated and strengthening provided if necessary.
