MEMORANDUM FROM DEPARTMENT OF BUILDING INSPECTION, PORTLAND, MAINE

July 7, 1959

Location--31 Cotton St.

Before tank and piping is covered from view, installer is required to notify the Fire De-t. Headquarters of readiness for inspection and to refrain from covering up until approved by the Fire De-t. Headquarters

1-2000
This tank of gallons capacity is required to be of steel or wrought iron no less in thickness than # 7 gauge; and before installation is required to be protected against corrosion, even though galvanized, by two coats of tar, asphaltum, or other suitable rust-resisting paint, and special protection where in corrosive soil such as cinders or the like.

Pipe lines connected to underground tanks, other than tubing and except fill lines and test wells, must be provided with double swing joints arranged to permit the tank to settle without impairing the efficiency of the pipe connections.

Owner and installer will have to bear the responsibility for the structural capacity of the tank to support loads from above such as heavy motor trucks.

If tank will be so located as to be subjected to the action of tide water or "ground" water, adequate anchorage or weighting must be provided to prevent "floating" when tank is empty or nearly so.

NOTES

9/21/72

CITY OF PORTLAND, MAINE
DEPARTMENT OF BUILDING INSPECTION

July 12, 1972

With relation to permit applied for to demolish a dwelling
at 32 Cotton St. it is unlawful
to commence demolition work until a permit has been issued from this
department.

Section 6 of the Ordinance for rodent and vermin control provides:
"It shall be unlawful to demolish any building or structure unless
provision is made for rodent and vermin eradication. No permit for the
demolition of a building or structure shall be issued by the Building
Inspection Department until and unless provisions for rodent and vermin
eradication have been carried out under supervision of a pest control
operator registered with the Health Department.

The building permit for demolition cannot be issued until the
provisions of this section have been satisfied. It is the obligation
of owner or demolition contractor or both to take up with the Health
Department the matter of complying with this section, being prepared
to inform that department what registered pest control operator is to
be employed.

Very truly yours,

R. Lovell Brown
Director

Dear Mr. Goodspeed:

Permit to construct a 1-story concrete block addition to the existing office building at the above address is being issued subject to plans and specifications received with application and in compliance with Building Code restrictions as follows:

1. In Fire District #1, in which this property is located, the distance of exterior walls closer than 5' to the property line dividing lots of private ownership shall be as for a separation of 2-hour fire resistance. The "C" openings shown in the north and south elevations for future A.C. units will need to be filled with 8" block, instead of the plywood and insulation as indicated.
2. All fire stopping at the floor and ceilings at outside walls, will need to be of incombustible material.

Very truly yours,

Archie L. Seekins

Mr. C. Donald McFadden,
36 Cotton St.,
Portland, Maine.

Dear Mr. McFadden:

In connection with our construction on our land at 34 Cotton St., we would appreciate very much your permission to bring materials across your parking lot and to use a space of eight to ten feet adjoining our land. This would be only while our construction is being on, and certainly not exceeding sixty days. Excavation will be dug right on property line to a depth of eight to ten feet.

We would, of course, restore your parking area to the condition in which we found it at our expense.

We would also assume all responsibility for any damage caused by ourselves or our contractors.

Sincerely yours,

Earle W. Noyes & Son

18 Cottage Farms Rd. 477 Congress St. 34 Cotton St.
Wape Elizabeth

Building permit for construction of a one story concrete block office building at the above location is issued herewith based on plans filed with application for permit, but subject to the following conditions:-

- if manner of support of floor framing on concrete foundation wall is to be changed, an amended detail of this construction is to be furnished.
- since the property is located in Fire District 11, all openings in rear wall and side wall towards Fore Street are required to be protected by fire-resistive doors and windows whenever they will be closer than 30 feet to openings in another building. This means that all such windows will need to be glazed with wire glass the same as indicated for those in wall toward Fore Street and it is likely that a fire door will need to be provided on opening in rear wall. Permit is issued on basis of compliance with this requirement.
- wherever wood strapping is used against masonry walls, incombustible firestopping is required between the strapping at floor and ceiling levels.
- a separate permit issuable only to the actual installer is required for installation of the heating equipment.

Very truly yours,

Albert J. Sears
Deputy Inspector of Buildings
