File: 57/1000-1

August 18, 1957

Mack, the Signist, 44 Canal St., Lewiston, Me.

Dear Sire

It seems very difficult to get reasonable cooperation from your organization.

Now the Maine Hardware and Equipment Co. sign at 618 Congress St. has been erected and we have had no notice and, therefore, have never madeinapection of the interior of the sign.

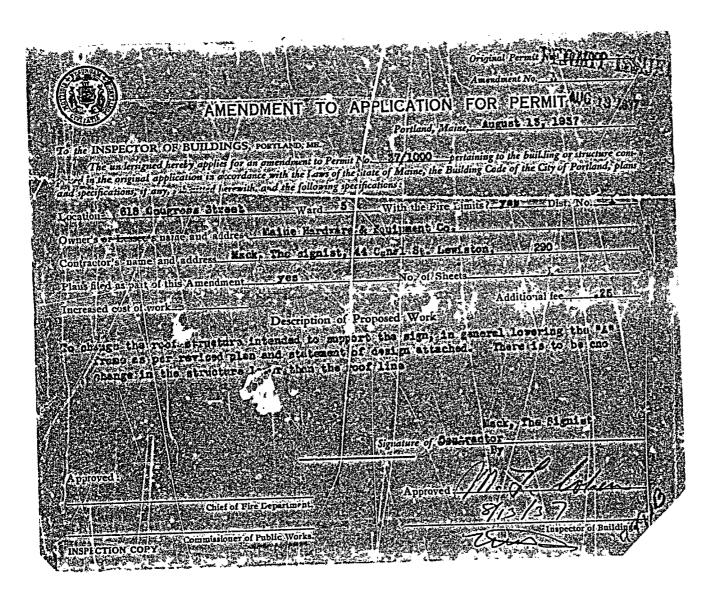

Picase have your men come to Portland on or before August 25, 1937 and creat ladders or otherwise make provision so that our inspector may examine the interfer. We should be given 24 hours notice of the time that you propose to make this inspection available.

If this occurs again, we shall require you to take the sign in question down again so that it may be examined on the ground.

Yory truly yours,

(Signed) WARREN McDONALD

Inspector of Buildings.

Rept. 3590E-I

June 18, 1937

Mack, The Signist, 44 Canal Street, Lewiston, Laine

Gentlemen:

Referring to your application for a permit to cover a projecting sign at 618 Congress Street, this sign depends upon a structure on the roof for its support.

On June 23, 1936 we sent to you with others a letter advising that it would be necessary thereafter to file with applications for permits for signs requiring wholly or in part any type of roof structure, a design plan by competent designer showing in detail the analysis of all structural members in the sign and its fastenings. We also said that it would be well for the designer to show his computations on the plan and that it would be also necessary to have on the plan a statement of design signed by the designer.

Under these circumstances and in the case of the sign now under consideration it will be necessary for you to comply with this ruling. Please see that the design plan is complete when it is sent in and avoid delay and aggrevation for all of us.

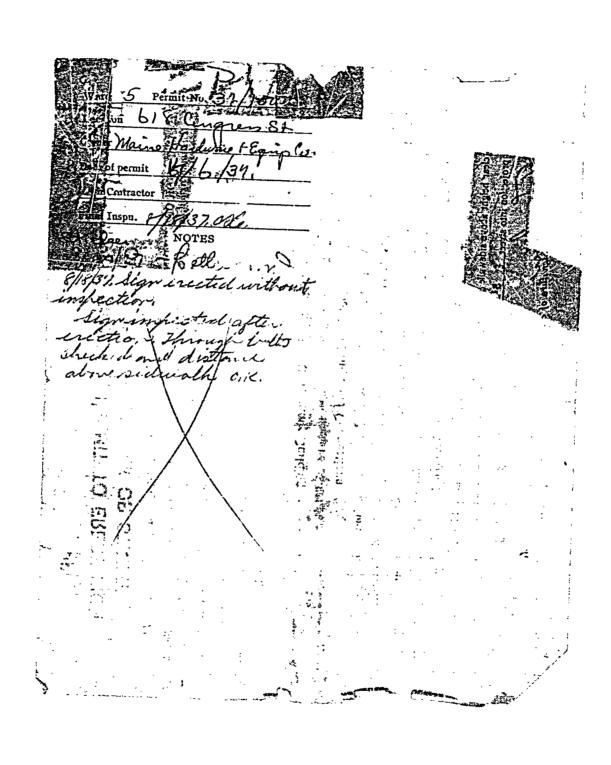

Very truly yours,

McD/H

Inspector of Buildings
