A. J. Bird Company, 12% orthography forthog, dains

Gentleson:

it appears that you are engaged in providing some sort of metal tria around the marques at Languley's destaurat at 350 Congress Street, and in two process have fastened up some mooder forms to fasten the metal to

The Bulloting Code provides that no part of this marques shall consist of combustible material.

Please have this woodmark completely removed on or before August 2, 1957 and explain to the collice just what you propose to do to the terribes so that we say find out whether or not there is sufficient alterations to require a paralt.

Very truly jours,

inspector of buildings

April 1, 1937.

Mr. Warren McDonald, Inspector of Buildings, Portland, Main

My dear Mr. McDonald:

This morning I received your letter and the permit for the signs at #630 Congress St., for which I thank you.

I have noted your various criticisms in regard to the signs and have arranged to have a brace put in the middle of the front sign to run back to the marquee roof. The l" firring channels to which the letters are fastened will be supported at two places along the unsupported span to the back of the sign so that they will withstand a wind pressure of 10 lbs. per sq. ft. upon the letters. The bottom of the letters will be fastened with 3/16" stove bolts to a 4" x 2" strap.

I am enclosing the signed statement and have arranged that you will be notified in plenty of time to have the signs inspected on the truck.

Thanking you for past favors, we remain

Very truly yours, DONNELLY ELECTRIC & NEON CO.

W. Werner - Engineer.

Pile: P. No. Sign 650 Congress St.-I

March 30, 1937

Mr. filliam Werner, C/O John Donnelly & Sons, 3134 Jachington St., Bonton, Mass.

Door Sir:

Enclosed is the parait covering erection of projecting signs on the marques and on the edge of the roof at 650 Congress St., this uity. The following matters are called to your attention:

The letters on the edge of the roof are considered a projecting sign and included in this permit. So shall have to reserve approval of the fastening of these letters until the letters are actually in place. The only question would be that of stiffness due to the fact that the letters are only to be fastened at their bottoms.

There should be a stiff-leg rugle ruming from some point above the middle of the middle vertical $12^4 \times 12^8$ angle in the front sign on the marques, extending back to the roof frame of the marques.

I can find no description of the lower connection of the letters of the marques signs. These connections should be no less than 1/15 thick. I understood that there were to be hangure from the frame of the morques signs above to the supports of the front letters. Hone is shown. The horizontal channels may be all right, but I have no information as to the section moduli of furring channels. As I see it the channels are on a 10-foot span. There strength should be such as to stand a 10 pounds per square foot wind load on the letters of which I have no detail.

Please fill in sign and return the enclosed statement of design promptly so that it may be attached to your plan. So will check all of these matters when the signs are inspected just prior to orection.

Very truly yours,

Me. /o

rel. 24, 1937.

Mr. Marren McDonald, Fldg. Inspector City Hall, Portland, Me.

My dear Mr. McDonel i:

I am encrosing plans and signed application for revisions to be eracted on the existing marriage of Langlev's Destaurant, at 4630 Congress Street. The old signs will be removed and new ones substituted in much the same manner at the present ones. All three signs will read LANGLEY'S in metal letters and metal and no less than 3/16" angle will be used throughout the signs.

We shall notify you 'n time so that you, or one of your inspectors may look these signs over before they are disced on the marquee.

Will you please mail the permit direct to me at #3190 Washington St., Jamaica Plain?

Thanking you for post favors, I am

Very truly yours, DONNELLY FLECTRIC & NEON CO. William Warmer.

File Paralt No.34/3008-I

Er. Joseph Langley, 650 Congress Street, Portland, aine.

Dear Sir:

Upon examination of the oil burner installed in the cellar of your restauran at 65) Congress Street for the purpose for heating hot water, an inspector from this office finds that the chimney requires attention around the place where the smoke pipe from the oil burning store enters it. Apparently an effort has been made in the past to cement this smoke pipe tigstly into the chimney, but this cement is coming loose. The chimney is also situated the chimney but this cement is coming loose. The chimney is also situated cast iron cleanout door and from at the bottom of the outmost flue.

Please have a retal thimble provided share this smake pipe enters the chirmey and have the retal thimble securely comented into the chirmey so that there may be no opening and no loose material around where the shake pipe enters the chirmey. Also provide a count income charmon, the chirmey also provide a count income charmon, the chirmey. enters the chimney; also provide a cast iron cleanout door and frame at the bottom of the chimney flue, all of this to be done on or office February 16,

Very truly yours,

WoD/H CC: Nuss Burner Mfg. Co. Inspector of Buildings.

On examining this burner we find that no instruction card has been posted near the burner. Please see that this instruction card is posted near the burner on or before February 16, 1935.

Copy to Realty Livestment Corporation, C/o Casco Mercantile Trust Gompany 195 Middle Street, Portland, Maine

September 27, 1934

Gofkanis Stores, Inc. 95 Bridge Street, Lowell, Mass.

Gantlamen:

With reference to the alterations which you have made in the building at 626 Congress Street, this City, under building permit No. 34/1060, the Chief of the Fire Department complains that the iron Ladder which you have substituted for a section of the original fire escape is not properly constructed in that the rungs of the ladder at about the middle are not equal distances spart, a condition which is likely to contribute to injury of persons using the ladder. It will be necessary to have this ladder altered or replaced so that all of the rungs of the entire ladder are equal distances from center to center.

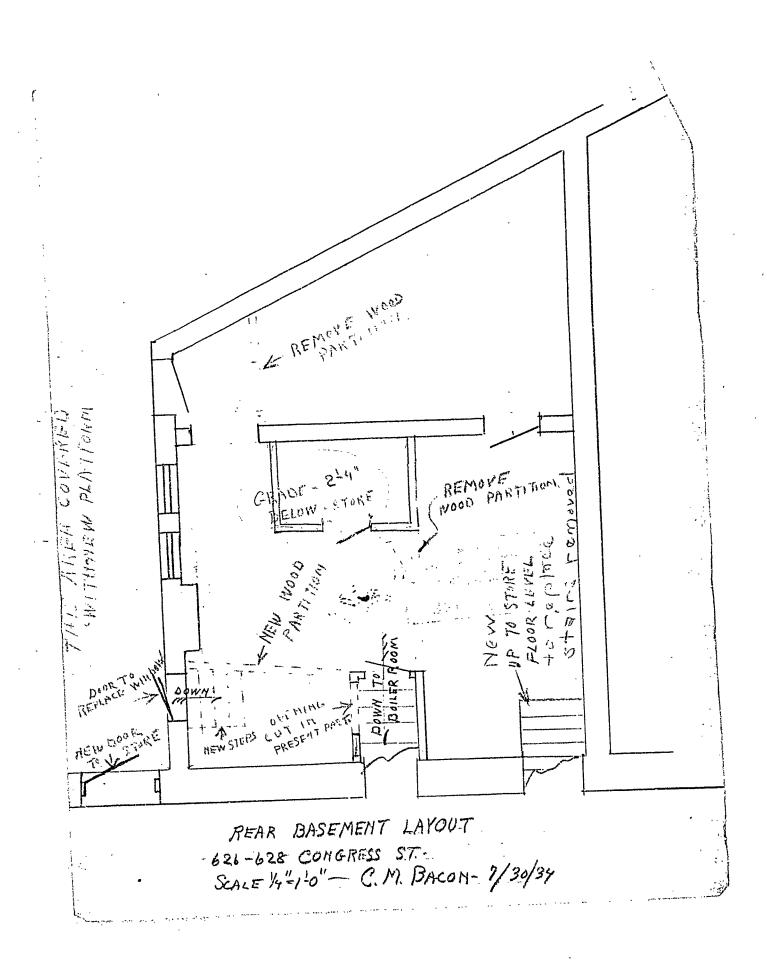

The original permit called for a loading platform with two floor levels and a roof over without enclosure on the ends. I find that you have built an enclosure at the ends of these two floor levels, part of the enclosing wall being built of word covered with netal and the rest being a doorney. This construction is not in accordance with the terms of your application, and is not in compliance with the Building Code, since this building is located in the Fire District. It will be necessary for you to remove these enclosing ends entirely and loave the platform open on the ends, or tone to this office and apply for an amendment to the original permit and then build a brick enclosing wall on the otherwise open ends.

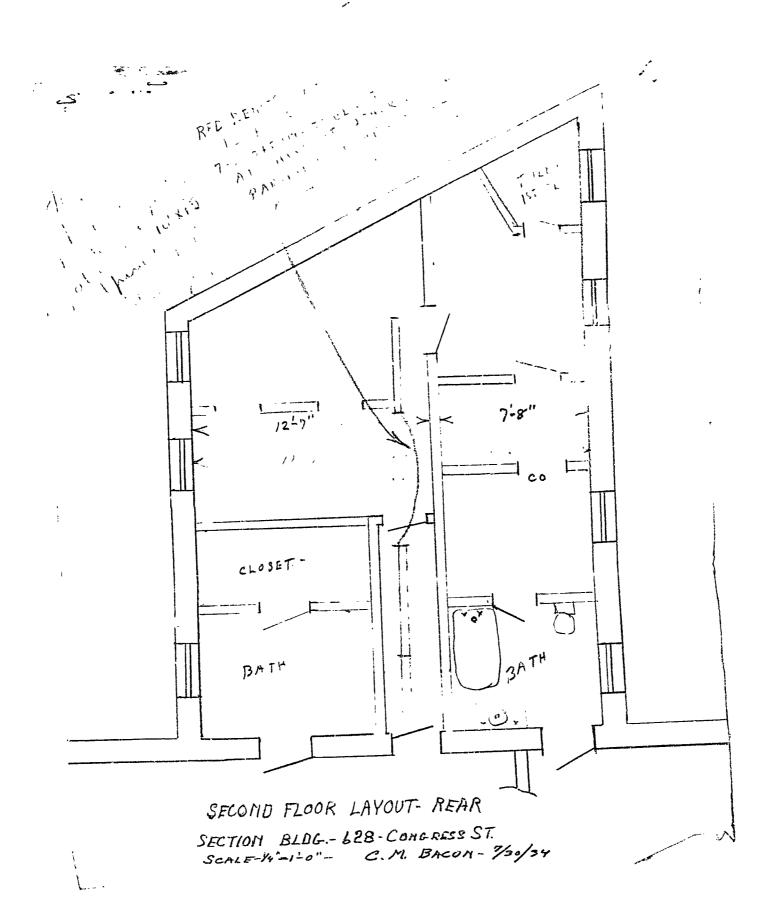

Please advise this office on or before October 8, 1934 which course you propose to parsue.

Very truly yours,

inspector of hulldings.
